

Maxim Gluhovsky, MD

Cardiothoracic Surgeon

Maxim Gluhovsky, MD, is a board certified thoracic and general surgeon, holding certifications from both the American Board of Thoracic Surgery and the American Board of Surgery. His clinical expertise spans a broad range of cardiothoracic conditions, with a particular focus on adult cardiac surgery, complex aortic disease and minimally invasive surgical techniques. Dr. Gluhovsky is skilled in the surgical management of coronary artery disease, valvular heart disease and disorders of the thoracic aorta, including aneurysms and dissections. He uses advanced, minimally invasive approaches whenever appropriate, aiming to reduce recovery times, minimize discomfort and improve long term outcomes for his patients.

With a commitment to patient-centered treatment, Dr. Gluhovsky works closely with multidisciplinary teams to ensure comprehensive evaluation and individualized surgical planning. His dedication to clinical excellence, combined with his specialized training, enables him to provide effective and compassionate care to patients requiring cardiothoracic intervention.
