Purpose and Scope of the Community Health Needs Assessment

Identifying and addressing unmet health needs within local communities is a fundamental responsibility of hospitals and health systems nationwide. The Affordable Care Act (ACA) reinforced this role by requiring tax-exempt hospitals to conduct a Community Health Needs Assessment (CHNA) every three years and to develop corresponding implementation strategies. These assessments serve as a cornerstone of community benefit planning for not-for-profit hospitals.

This CHNA reflects Saint Francis Hospital’s ongoing commitment to improving health outcomes across its service area through a comprehensive evaluation of community health status. To ensure a meaningful and collaborative approach that best represents and serves the community, Saint Francis elected to conduct a **CHNA-Lite** in Fiscal Year 2026. This CHNA-Lite contains the required components necessary to comply with Internal Revenue Service regulations while allowing for flexibility in timing and scope.

The decision to complete a CHNA-Lite in FY26 was made to align future CHNA cycles with the State of Delaware’s Community Health Improvement planning timeline in FY27. This alignment will enable Saint Francis Hospital to collaborate more fully in a coordinated, statewide CHNA process moving forward, strengthening partnerships and promoting shared strategies to address priority health needs.

Input from community residents, stakeholders, and local leaders informed this assessment and the identification of priority health issues. Through this approach, Saint Francis Hospital seeks not only to meet regulatory requirements, but also to strengthen community partnerships, advance collective impact, and ensure alignment with Delaware State Health Improvement Plans.

CHNA goals:

- Engage public health and community stakeholders, including community-based organizations and underserved populations.
- Assess and understand the community’s most pressing health issues, with emphasis on priority ZIP codes.
- Identify risk factors and social determinants influencing health outcomes, as well as opportunities for collaboration.
- Use findings to develop and adopt an implementation strategy focused on the highest-priority needs.

Saint Francis Hospital

157 Hospital Beds

56,631 Outpatient Visits

3,799 Admissions

26,224 ED visits

480 Physicians

Saint Francis Hospital conducts a Community Health Needs Assessment to identify priority health issues and guide resource allocation that supports improved community health and well-being. The organization primarily serves the City of Wilmington, including the high-need ZIP codes 19801, 19802, and 19805. Saint Francis Hospital, located in ZIP code 19805 near Census Tract 22, is situated within one of the region’s most underserved neighborhoods. These high-need areas consistently experience poorer health outcomes compared to more affluent communities.

Saint Francis Hospital primarily serves the City of Wilmington, which has some of the highest socio-economic needs zip codes in the State of Delaware— 19801, 19802 and 19805. Saint Francis Hospital is located in 19805, just blocks from Census Tract 22, a high-needs neighborhood. Zip codes considered high needs generally have poorer health outcomes than zip codes in more affluent neighborhoods.

Saint Francis Hospital recognizes the broad range of priority health needs identified through the CHNA process, based on input from community partners, health care providers, public health experts, and human service agencies. The hospital has determined it can most effectively address those needs that are most urgent, underserved, and within its capacity to influence.

Over the next three years, Saint Francis Hospital will focus on the following priority areas:

- 1. Access to Care**
- 2. Food Access**
- 3. Housing**

Demographics

	New Castle County	Wilmington	Census Tract 22

Introduction & Previous CHNA

Saint Francis Hospital

For 100 years, Saint Francis Hospital has served the Wilmington community and Northern New Castle County by providing compassionate health care of the highest quality. Founded by the Sisters of Saint Francis of Philadelphia in 1924, Saint Francis heeds a particular call to serve those in need. Our ministry is to serve all who require expert medical care regardless of religion, race, color, creed or economic status. A member of Trinity Health, Saint Francis offers emergency care, cardiology, cancer care, family medicine and women's health among other services. In addition to providing health care in an acute setting, Saint Francis also offers LIFE (Living Independently for Elders), a program of all-inclusive care for seniors, a Home Care program and a variety of affiliated physician practices.

Equally important to the acute health care services Saint Francis provides, there are the many charity care programs that we sponsor. The Tiny Steps program assists women in need who may be expecting or planning a family, and children in the first year of life. The Center of Hope reaches out to persons who may have health needs in the bilingual community. Our Cancer Outreach and Education series promotes cancer education and screenings. The Financial Assistance program helps people to receive care regardless of their ability to pay.

Trinity Health Mid-Atlantic is a Regional Health System that includes Mercy Fitzgerald Hospital in Darby, Pa.; Nazareth Hospital in Northeast Philadelphia; Saint Francis Hospital in Wilmington, Del.; St. Mary Medical Center in Langhorne, Pa. and home health and LIFE programs. Trinity Health Mid-Atlantic is a member of Trinity Health, one of the largest multi-institutional Catholic health care delivery systems in the nation.

Mission

We, Trinity Health Mid-Atlantic, serve together in the spirit of the Gospel as a compassionate and transforming healing presence within our communities.

Saint Francis at Home

Saint Francis at Home, a member of Trinity Health Mid-Atlantic, strives to restore patients' health and independence from the comfort of home with award-winning clinical services. Saint Francis at Home, along with other Trinity Health Mid-Atlantic home health programs, delivers a range of home-based health care services to nearly 35,000 patients annually through nearly half a million patient visits. Saint Francis at Home serves New Castle County, Del.

Saint Francis LIFE

Saint Francis LIFE (Living Independence for the Elderly), a nationally recognized Program of All-inclusive Care for the Elderly (PACE), offers all-encompassing medical and social services that enable older adults to remain independent in their homes and communities. Saint Francis LIFE, a member of Trinity Health Mid-Atlantic, serves New Castle County, Del.

2023 Community Health Needs Assessment

The previous Community Health Needs Assessment (CHNA) was adopted on May 25, 2023. Guided by input from community partners, healthcare providers, public health experts, human services agencies, and other stakeholders, Saint Francis Hospital identified three priority areas for its 2023–2025 community health improvement efforts:

1. Housing, including homelessness
2. Food Access/Insecurity
3. Access to Care

This summary outlines the key activities and progress achieved by Saint Francis Hospital in response to the 2023 CHNA.

Housing, including homelessness

Goal: Saint Francis Hospital will partner with community-based organizations in support of housing preservation, housing development, and advocacy efforts that focus on the disadvantaged communities where the need is great, but the conventional market is not able to meet that need. This work will advance affordable housing as a platform for creating more equitable and healthier communities.

Impact: Saint Francis Hospital advanced housing stability during the CHNA period through the Transforming Communities Initiative (TCI) grant, which provided \$437,735 to Cornerstone West CDC to implement evidence-based strategies addressing key housing-related drivers of health. The hospital contributed a 10% match to support Cornerstone West’s Aging & Staging Homeowner Repair Program, improving safety and accessibility for low-income and elderly homeowners. Saint Francis also continued its partnership with Cornerstone West CDC and Delaware Valley Development Corporation on the Vistas at Saint Francis, a planned 57-unit affordable senior housing project. In FY25, the partnership completed a feasibility study and secured rezoning of an existing hospital parking structure to support project development.

Food Access/Insecurity

Goals: Expand resources during the CHNA cycle that are directed at this priority topic so that we can increase capacity of community-based organizations to address present barriers to equitable food access including high cost of foods, limited food options within a neighborhood, and limited ability to navigate via transportation to food resources.

Impact: Saint Francis addressed food insecurity through multiple community partnerships during the CHNA period. In FY23, the hospital supported more than 307 families through the Food Bank of Delaware Mobile Food Pantry. Saint Francis also provided 7,740 farm boxes at no cost to food-insecure individuals, many managing diabetes or obesity, through contracts with Lancaster Farm Fresh Cooperative and partnerships with Marydale Retirement Village. To further support families with limited access to nutritious food, the hospital distributed 618 grocery gift cards. Through a collaboration with Las Americas Aspira, Saint Francis provided 9,908 backpack meals to students lacking reliable food outside the school week. In FY24–FY25, the Health Equity Center added 1,312 backpack meals and 485 adult meals for community members. Additionally, the emergency department supplied 83 emergency meal packs for individuals experiencing homelessness. Saint Francis screen patients using Epic social needs screening tool to support those in need of food resources and programs supporting access to healthy foods in both outpatient and inpatient settings.

Access to Care

Goal: Prioritize access to high-quality, equitable and affordable health care and social services when and where they need it, for the residents of Wilmington.

Impact: During the CHNA period, Saint Francis Hospital advanced access to equitable and affordable healthcare for Wilmington residents through several targeted initiatives. In FY23 the Saint Clare Medical Outreach Van referred 60 patients who lack access to affordable medications to Dispensary of Hope pharmacy charity care programs for insulin and other medications. The hospital enrolled 902 patients in Medicaid and financial assistance programs and provided transportation for 163 low-income patients to ensure access to medically necessary care. The Community Aid Refurbished Equipment Store supported 37 residents with essential durable medical equipment. Saint Francis also expanded preventive health services by delivering the National Diabetes Prevention Program to 258 participants and offering the Tiny Steps program, which provides prenatal care, bilingual education, counseling, and essential baby items to expectant parents regardless of ability to pay.

To strengthen access to coordinated social care, the Trinity Health Mid-Atlantic Board supported the implementation of the Healthy Village model. In FY25, construction of the Healthy Village main street enabled five community partners to co-locate on the Saint Francis campus, increasing access to social services and resources that address health disparities, reduce avoidable utilization, and improve social influencers of health for Wilmington residents.

Written Comments Received on the Prior CHNA and Implementation Strategy

The prior CHNA and Implementation Strategy were made available for public review electronically at: <https://www.trinityhealthma.org/community-benefit/chna/saint-francis>, printed copies were also available at Saint Francis Hospital, 701 N. Clayton Street, Wilmington, DE 19805. The links on the website also include the federal IRS Form 990 tax return and an overview of Community Benefit at Saint Francis. No written comments on the last CHNA and Implementation Strategy have been received.

CHNA Methods & Process

The Association for Community Health Improvement’s (ACHI) community engagement model frames our Fiscal Year 2026 CHNA. Steps 1 through 6 on the diagram below are the focus of this Report. Step 7, the Implementation Plan, will be made available on or before November 15, 2026. Steps 8 and 9 will be rolled out between Fiscal Year 2027-2029.

Stakeholder Engagement

We prioritized early and meaningful engagement with community stakeholders throughout the CHNA process. By participating in neighborhood, city, and county coalitions addressing community health needs from various perspectives, we broadened our understanding and strengthened collaboration.

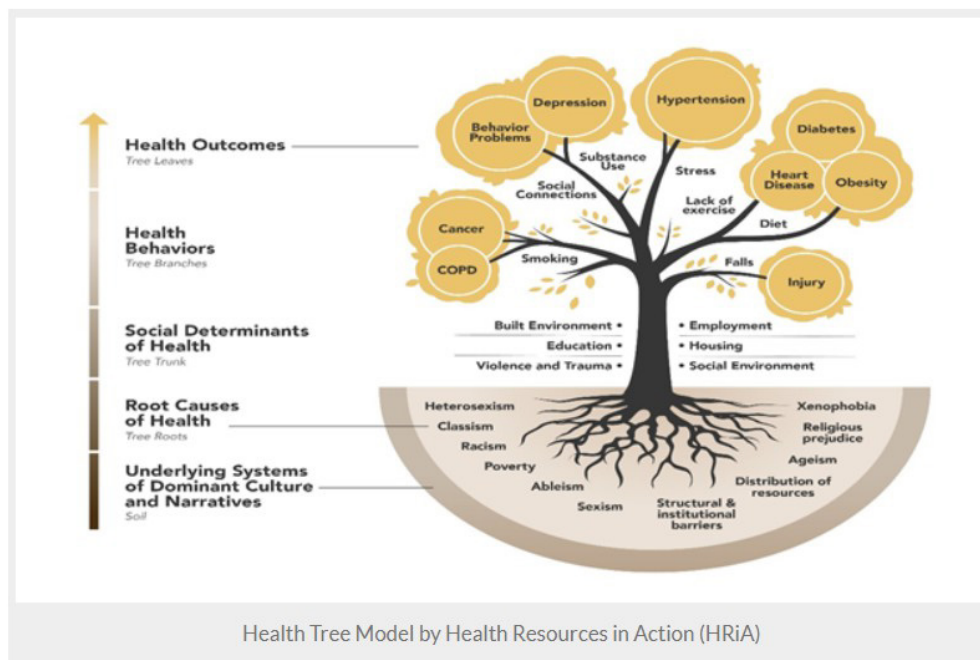

Key community partners included Westside Grows Together, Green for the Greater Good, Community Health Advocacy Mobilization Group (CHAMG), Health Literacy Council, Delaware Hospital Association, Partnership for Healthy Communities, among others. This consistent, ongoing engagement expanded our stakeholder network and informed us of the overall direction of the FY 2026 CHNA. These meetings provided a forum for CHNA discussions.

Our Approach to Health Equity

Community Health Needs Assessments (CHNAs) and Implementation Strategies are IRS requirements, but Trinity Health conducts them as a core practice to engage communities and guide Community Health & Well-Being efforts. This work focuses on improving health for people experiencing poverty and other vulnerabilities by connecting clinical and social care, addressing social needs, reducing systemic racism, and advancing health equity. Trinity Health follows the Robert Wood Johnson Foundation’s definition of health equity, which emphasizes ensuring everyone has a fair and just opportunity to be as healthy as possible by removing barriers such as poverty, discrimination, and limited access to education, safe housing, and quality healthcare.

Health equity means ensuring that every person has a fair and just opportunity to achieve their highest level of health. The accompanying tree graphic illustrates how inequities are rooted in long-standing social, economic, and structural systems that have historically concentrated power and resources among certain groups while marginalizing others. These systemic factors continue to influence health outcomes today and shape disparities in healthcare access, chronic disease burden, social conditions, and overall well-being. For hospitals, understanding these structural drivers is essential to identifying current gaps and designing strategies that meaningfully improve community health. As part of this CHNA, the hospital incorporates an equity lens to guide decision-making, resource allocation, and partnerships to ensure that interventions reach populations most affected by inequities.

Systemic inequities, structural poverty, and other root-cause conditions continue to reinforce long-standing disparities in power, resources, and opportunity. These factors are embedded in public policies, institutional practices, including those within healthcare systems—and individual behaviors. As a result, characteristics such as race, ethnicity, age, gender, income, and disability status often influence a person’s ability to access high-quality health care, earn a living wage, secure safe and affordable housing, experience safety, obtain a strong education, and access nutritious foods and opportunities for physical activity.

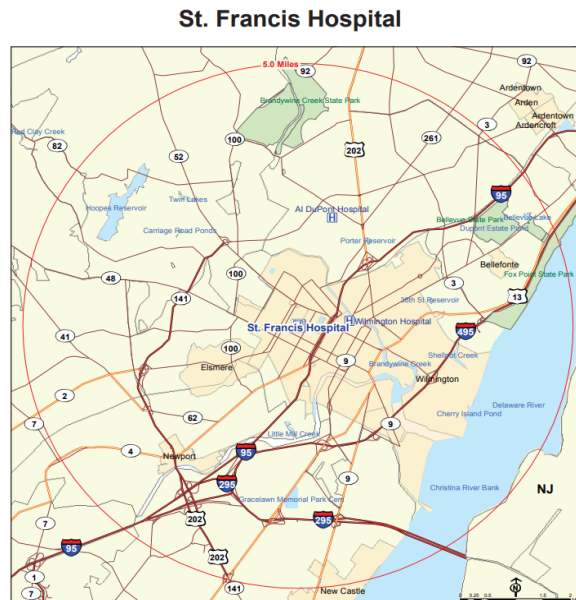

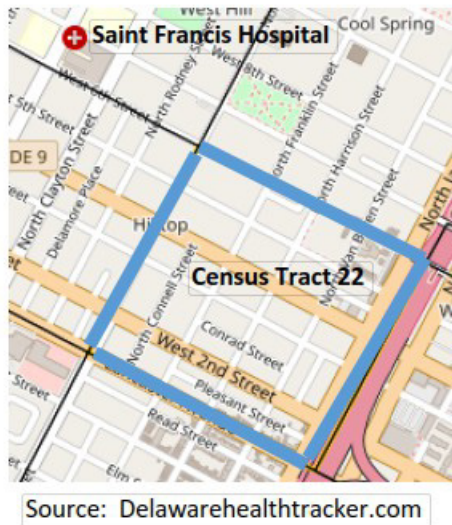

Community Served

For the purposes of the 2026 CHNA Saint Francis Hospital used a geographic approach focusing on the area which most patients come for care and defines the community served as: 1) The City of Wilmington; and 2) Census Tract 22, bounded by West 6th Street to the North; I-95 to the west; Lancaster Avenue to the South; and Broom Street to the East.

The defined service area and population ensured an inclusive assessment process that did not overlook minority, low-income, or medically underserved groups. Saint Francis Hospital, located in ZIP code 19805, serves as a core inner-city community hospital with proximity to the neighborhoods most impacted by health inequities.

The map illustrates Saint Francis Hospital’s proximity to Wilmington ZIP codes 19801, 19802, and 19805, with the darkest shading indicating the highest socioeconomic need. Census Tract 22—located just blocks from the hospital—has elevated poverty rates, particularly among children, and consistently poor health outcomes. As a high-need area within 19805, Census Tract 22 represents a strategic opportunity for Saint Francis Hospital to address concentrated community needs and improve health outcomes in a neighborhood that has historically been underserved.

Data Collection and Analysis

The development of CHNA involved an inclusive, equity-driven, community centered methodology inspired by the Vital Conditions for Health and Well-Being framework (Figure below). The Vital Conditions for Health and Well-Being encompass the essential elements necessary for the long-term well-being of a community. The framework is comprised of seven vital conditions: 1) humane housing; 2) belonging and civic muscle; 3) lifelong learning; 4) thriving natural world; 5) meaningful work and wealth; 6) basic needs for health and safety; and 7) reliable transportation. This framework illustrates the interconnectedness of these domains, demonstrating the necessity of all vital conditions for a thriving community. Applying the vital conditions framework provides opportunities for cross-sector collaboration and guides targeted public health interventions to improve population health outcomes individually and systemically.

Vital Conditions for Health and Well-Being

We utilized existing data published by others (secondary data) and collected direct input from residents through a community survey (primary data). The survey successfully captured the diverse voices of the community, including insights from individuals and organizations serving children, homeless populations, LGBTQ+ individuals, Spanish-speaking residents, public health organizations, school districts, and health care providers. This inclusive approach is crucial for capturing a wide range of facts and perspectives, ensuring we accurately identify the community's most pressing health needs. We analyzed statistics on health status, access to care, and related indicators using data from local, state, and federal agencies, as well as local community service organizations.

In addition to the data analysis, we inventoried and reviewed existing state and community reports to better understand the contextual relationship between Saint Francis CHNA and the broader healthcare landscape. Please see Appendix B for an inventory of reports reviewed, and Appendix D for Community Assets.

Secondary data was collected between July 2025 and December 2025 to describe the population living within the region that is being served. Previously published reports documenting regional health needs were reviewed to develop a list of data sources and commonly used indicators to describe the population. The review showed that demographic, socioeconomic, environmental, and

health data were commonly used. Four direct sources were used for the secondary data analysis. These sources are listed below:

- Trinity Health Data Hub: The Trinity Health Data Hub provides hospitals and community benefit teams with streamlined access to key health outcomes and behavioral data. It offers two primary reports: a customized Community Health Needs Assessment (CHNA) and a Vital Sign report. Data is available by hospital service area, aggregated regions, and system wide. The CHNA report includes standardized indicators defined by the Community Health & Well-Being (CHWB) Council, which all Trinity Health ministries must incorporate in their analyses. This data can be found at <https://trinityhealthdatahub.org/> (Appendix A)
- My Healthy Community Profile Reports: The Delaware Division of Public Health’s on-line database of community level statistics for substance use disorder, asthma, air quality, and drinking water. My Healthy Community is found at: <https://dhss.delaware.gov/dph/my-healthy-community/> as well as <https://data.delaware.gov/>
- University of Wisconsin Population Health Institute. County Health Rankings Delaware State Report 2025. <https://www.countyhealthrankings.org/health-data/delaware/data-and-resources>

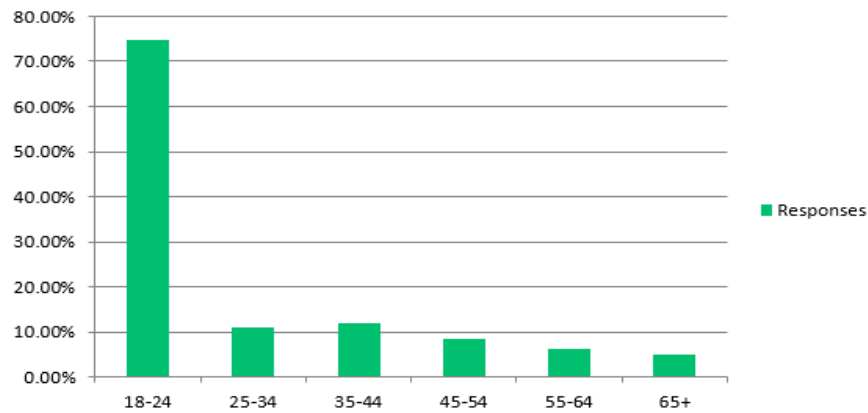

Primary data was gathered through community surveys, and community meetings between July 2019 and February 2023.

While the basic structure and format of the report remain consistent with prior assessments, the 2026 CHNA reflects an evolving and deepening commitment to health equity, community engagement, and data-driven decision-making. Since the last CHNA, Saint Francis has attended and participated in neighborhood, city, and state level meetings to promote future alignment of CHNA priorities among multiple stakeholders.

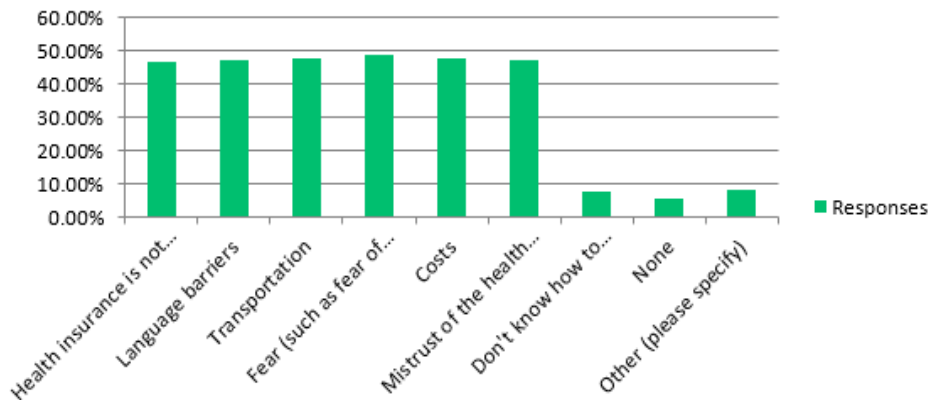

Community Survey

An online community survey was administered through SurveyMonkey from November to December 2025 to gather input on local health needs and priorities. The survey included questions on demographics, racial and social equity, social determinants of health, healthcare access, and lifestyle behaviors. It was distributed through multiple channels—including paper copies, web links, and QR codes—and was available in both English and Spanish. Community-based organizations and the Saint Francis Hospital Health Equity Center assisted with dissemination to ensure broad participation. A total of 1,275 community members completed the survey. The full survey instrument is provided in Appendix C. Below are some of the data points collected through the community survey.

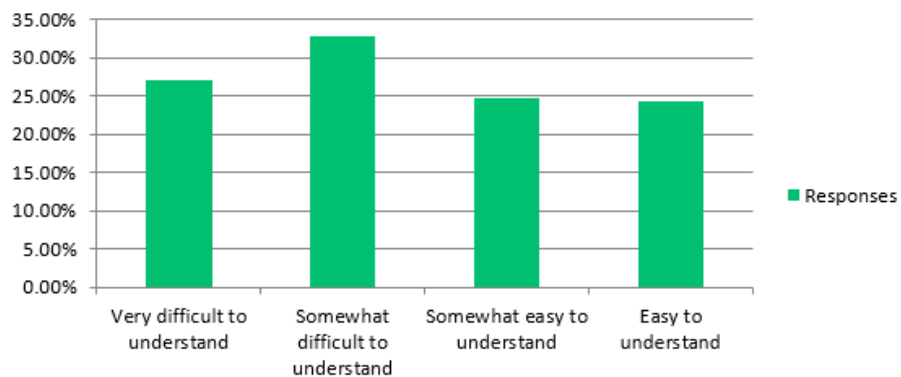

What is your age group (years)?

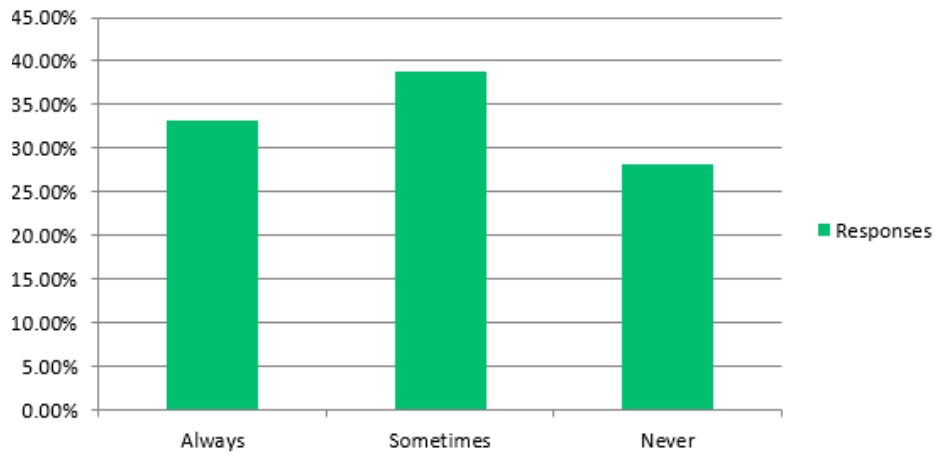

Thinking about the community where you live, which barriers prevent access to health care? (check all that apply)

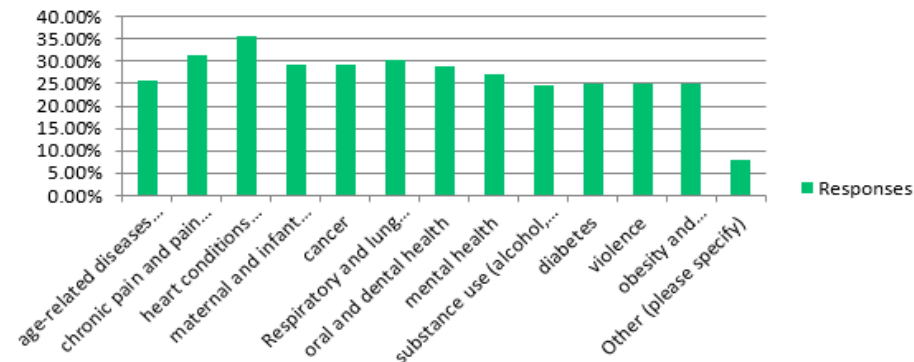

How would you describe the health or medical information you receive in terms of being easy or difficult to understand?

Do you always have enough food for your family?

Thinking about yourself or other adults in the community where you live, what are the top 3 health problems?

What is your current living situation?

The overall goal of the community health needs assessment is to identify and prioritize the needs of community members. Here are some additional comments from community members surveyed.

Thinking about the community where you live, which barriers prevent access to health care?

“Lack of cultural humanity.”

“Getting a response from the health care providers.”

“Not being able to afford health care and not being able to get Medicaid either.”

Significant Community Health Needs

Process for Significant Needs Identification

As determined by analysis of quantitative and qualitative data, with an overarching focus on advancing health equity, recognizing that racism and poverty contribute to measurable health disparities, Saint Francis developed a collaborative, community-engaged approach to comprehensively assess the health needs of the population defined by the CHNA. Significant Community Health Needs were identified by: 1) data analysis comparing Delaware to national health and well-being benchmarks (County Health Rankings, Trinity Data Hub, City and State Improvement Plans) and measuring the difference between the benchmark and the community's performance on the benchmark; 2) conducting an on-line community health survey; and 3) engaging community partners in a prioritization process to identify and prioritize needs from the community perspective.

Prioritization of Needs Process

Criteria weighting is a quantitative decision-making tool that assigns importance percentages (weights) to different factors, helping to rank alternatives by multiplying scores by weights and summing them. It reduces bias, balances competing priorities, and ensures that critical, higher-impact criteria drive the final choice. This is the tool used to prioritize the community health needs for this CHNA. Community based organizations who partner with Saint Francis through the Healthy Village initiative were asked to score needs using the criteria (Key factor in achieving Health Equity, Potential Impact, Feasibility/Measurable, Consequences of Inaction) using the ranking guidance. A final score was computed for each health need by the score for each criterion and adding the weighted scores. Prioritization tool is provided as Appendix E. An aggregate score for each community health need was calculated as an average of the scores for that health need. The health needs were then prioritized from highest to lowest final aggregate score.

The Saint Francis CHNA priorities are:

1. Access to Care
2. Food Access
3. Housing

Each priority area will specifically target special needs populations in an effort both to help the State of Delaware reduce health disparities, and to uphold Saint Francis Hospital's mission to serve as a compassionate and transforming healing presence within our communities.

Conclusion

Saint Francis Hospital is in the process of completing the Community Health Implementation Plan due no later than November 15th, 2026. The Implementation Strategy Plan will identify specific programs and strategies for each of the three priority areas outlined in this Community Health Needs Assessment. Copies of the Community Health Needs Assessment may be found on-line <https://www.trinityhealthma.org/community-benefit/chna/saint-francis> at or you may request a printed copy by visiting Saint Francis Hospital in person at 701 North Clayton Street, Wilmington, DE 19805.

Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 57,188 persons

in the report area are of foreign birth, which represents 12.98% of the report area population. This percentage is less than the national average of 14.14%.

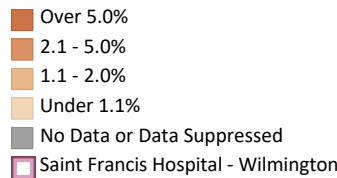

Report Area	Total Population	Naturalized U.S. Citizens	Population w/o U.S. Citizenship	Total Foreign-Birth Population	Foreign-Birth Population, Percent of Total Population
Saint Francis Hospital - Wilmington	440,462	30,166	27,022	57,188	12.98%
Kent County, DE	187,604	8,629	5,254	13,883	7.40%

Foreign-Born Population (Non-Citizen or Naturalized), Percent by Tract, ACS 2020-24

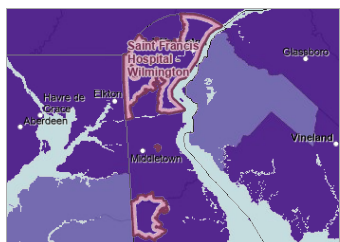

Medicare Enrollment

This indicator reports information about the Medicare population, including the number of beneficiaries enrolled in parts A & B (the Fee-for-Service population) and the number enrolled in Medicare Advantage. Demographic information is provided for the Fee-for-Service population only. In the report area, there are 77,061 Medicare Beneficiaries. Of those, 13.55% are eligible for Medicaid. The average age of the Fee-for-Service population is 74.

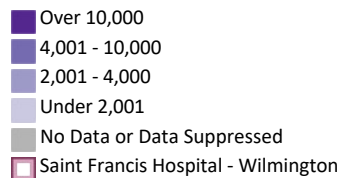

Report Area	Total Medicare Beneficiaries	Medicare Advantage Beneficiaries	FFS Beneficiaries	Medicaid Eligible, Percentage	Avg. Age of FFS Beneficiaries
Saint Francis Hospital - Wilmington	77,061	25,922	51,139	13.55%	74

Population Geographic Mobility

This indicator reports information about population in-migration by assessing changes in residence within a one year period. Of the 436,493 persons residing in the report area, an estimated 4.95% relocated to the area, according to the latest American Community Survey 5-year estimates. Persons who moved to a new household from outside of their current county of residence, from outside their state of residence, or from abroad are considered part of the in-migrated population. Persons who moved to a new household from a different household within their current county of residence are not included.

Population Under Age 18

Of the estimated 440,462 total population in the report area, an estimated 91,832 persons are under the age of 18, representing 20.85% of the population. These data are based on the latest U.S. Census Bureau American Community Survey 5-year estimates. The number of persons under age 18 is relevant because this population has unique needs which should be considered separately from other age groups.

Data Source: US Census Bureau, American Community Survey, 2020-24.

Population with Any Disability by Disability Status

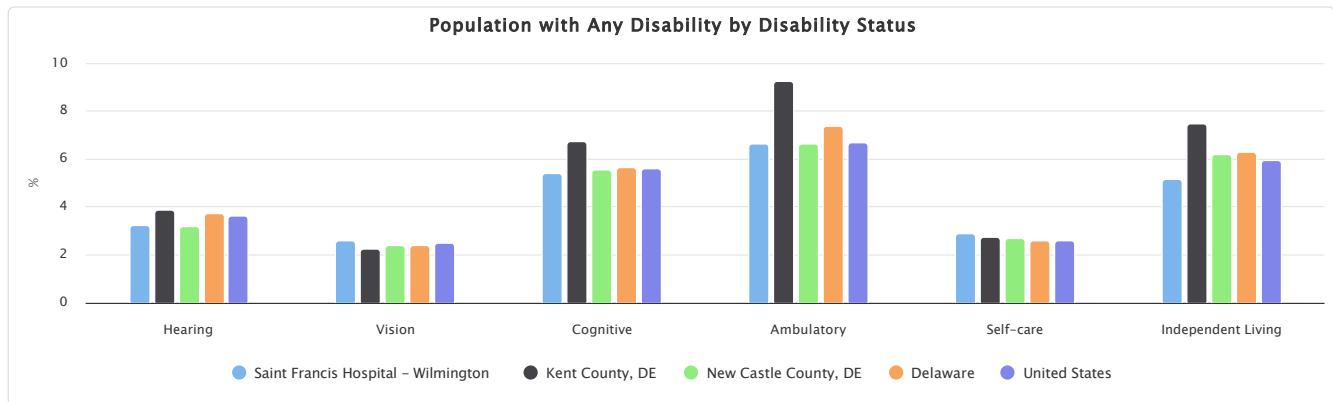

This indicator reports the percentage of the total civilian non-institutionalized population with a disability by disability status. Note that ACS measures disability status within different age groups: hearing and vision difficulty for all the people; cognitive, ambulatory, and self-

care for people 5 years and older; and independent living for people 15 years and older (reported for people 18 years and older in ACS2020-24 data).

Percentage values can be interpreted as follows: Within the report area, individuals with hearing difficulty are 3.22% of the total population; individuals with vision difficulty are 2.58% of the total population; individuals with cognitive difficulty are 5.40% of the total population age 5+; individuals with ambulatory difficulty are 6.65% of the total population age 5+; individuals with self-care difficulty are 2.86% of the total population age 5+; and individuals with independent living difficulty are 5.15% of the total population age 18+.

Report Area	Hearing	Vision	Cognitive	Ambulatory	Self-care	Independent Living
Saint Francis Hospital - Wilmington	3.22%	2.58%	5.40%	6.65%	2.86%	5.15%
Kent County, DE	3.85%	2.23%	6.74%	9.24%	2.73%	7.45%
New Castle County, DE	3.20%	2.41%	5.56%	6.61%	2.68%	6.18%
Delaware	3.73%	2.39%	5.66%	7.38%	2.58%	6.29%
United States	3.61%	2.48%	5.59%	6.66%	2.57%	5.93%

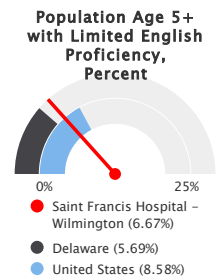

Data Source: US Census Bureau, American Community Survey, 2020-24.

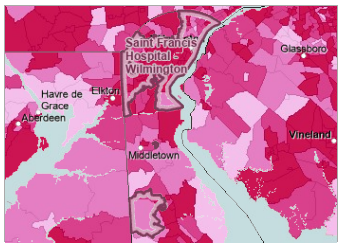

Population with Limited English Proficiency

This indicator reports the percentage of the population aged 5 and older who speak a language other than English at home and speak English less than "very well". This indicator is relevant because an inability to speak English well creates barriers to healthcare access, provider communications, and health literacy/education. Of the 416,120 total population aged 5 and older in the report area, 27,744 or 6.67% have limited English proficiency.

Report Area	Population Age 5+	Population Age 5+ with Limited English Proficiency	Population Age 5+ with Limited English Proficiency, Percent
Saint Francis Hospital - Wilmington	416,120	27,744	6.67%

Data Source: US Census Bureau, American Community Survey, 2020-24.

Total Population by Age Groups, Total

Saint Francis Hospital - Wilmington

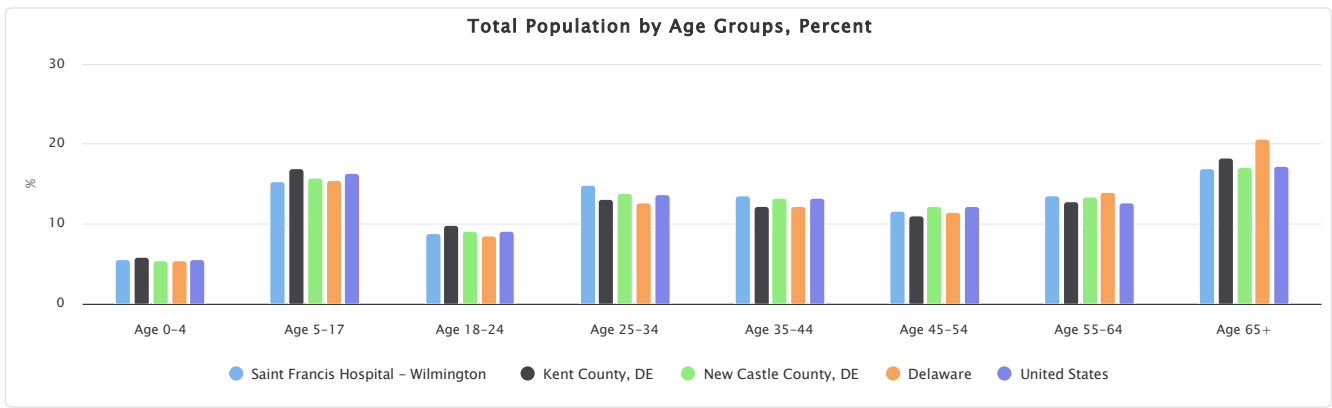

Total Population by Age Groups, Percent

This indicator reports the percentage of age groups in the population of the report area.

The percentage values could be interpreted as, for example, "Of the total population in the report area, the percentage of population age 0-4 is (value)."

Report Area	Age 0-4	Age 5-17	Age 18-24	Age 25-34	Age 35-44	Age 45-54	Age 55-64	Age 65+
Saint Francis Hospital - Wilmington	5.53%	15.32%	8.86%	14.81%	13.56%	11.58%	13.48%	16.87%
Kent County, DE	5.83%	16.95%	9.82%	13.07%	12.26%	11.04%	12.75%	18.28%
New Castle County, DE	5.46%	15.77%	9.06%	13.85%	13.28%	12.18%	13.35%	17.05%
Delaware	5.35%	15.38%	8.47%	12.62%	12.18%	11.44%	13.99%	20.57%
United States	5.61%	16.34%	9.14%	13.68%	13.21%	12.17%	12.66%	17.21%

Data Source: US Census Bureau, American Community Survey, 2020-24.

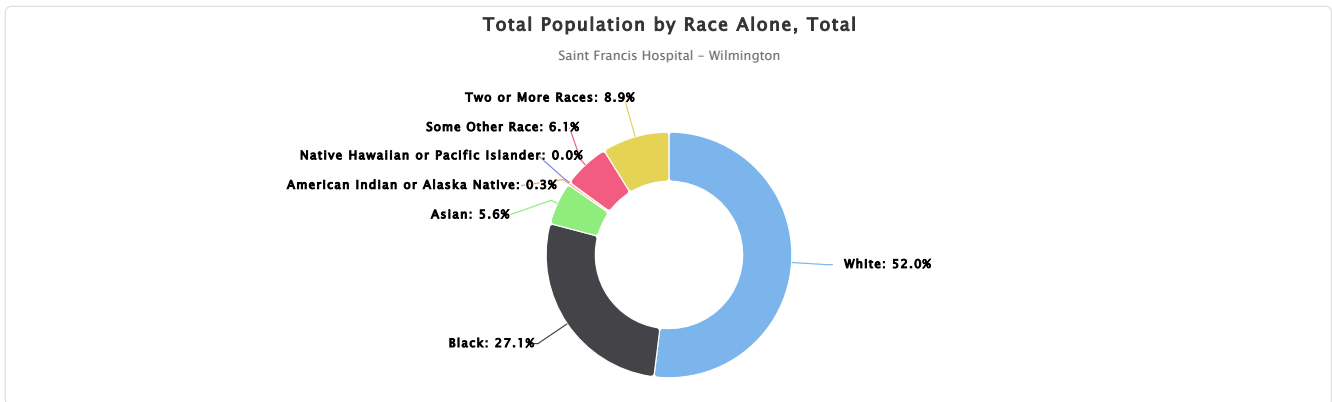

Total Population by Race Alone, Total

This indicator reports the total population of the report area by race alone, without considering respondents' ethnicity. An ACS survey respondent may identify as a single race, or may choose multiple races. Respondents selecting multiple categories are racially identified as "Two or More Races."

Report Area	White	Black	Asian	American Indian or Alaska Native	Native Hawaiian or Pacific Islander	Some Other Race	Two or More Races
Saint Francis Hospital - Wilmington	228,894	119,480	24,693	1,313	195	26,853	39,034
Kent County, DE	108,953	50,730	4,694	927	105	4,325	17,870

New Castle County, DE	59.34%	28.19%	7.01%	0.05%	0.03%	0.56%	4.82%
Delaware	65.34%	24.03%	4.80%	0.14%	0.02%	0.57%	5.10%
United States	71.15%	14.77%	7.28%	0.63%	0.21%	0.69%	5.27%

Data Source: US Census Bureau, [American Community Survey, 2020-24](#).

Total Population by Combined Race and Hispanic Ethnicity

This indicator reports the percentage of the total population in the report area by combined race and Hispanic ethnicity.

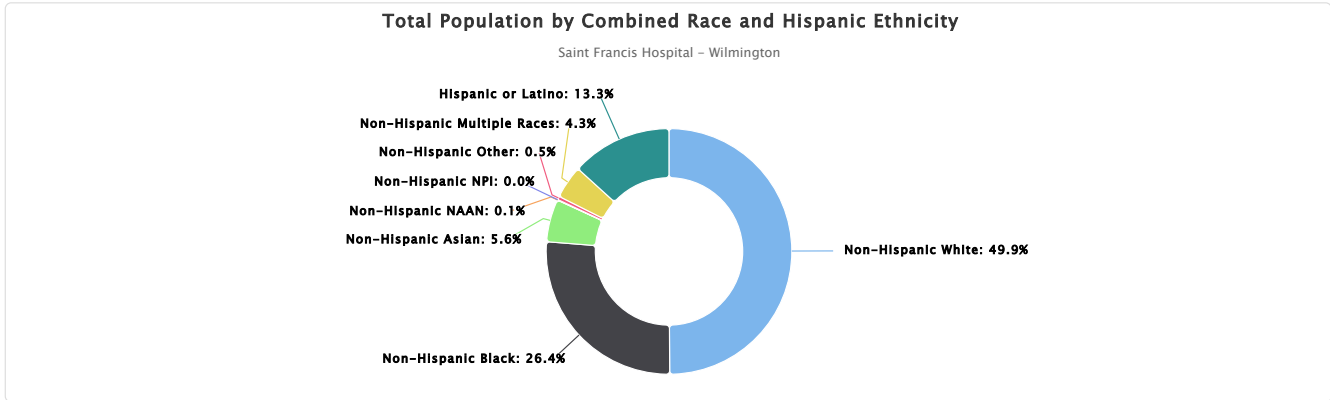

The percentage values could be interpreted as, for example, "Of all the population in the report area, the percentage of population who are non-Hispanic white is (value)."

Note: Some of the combined race/ethnicity groups use acronyms for their names in the following table and chart. The full forms are as followed:

- Non-Hispanic NAAN = Non-Hispanic Native American or Alaska Native
- Non-Hispanic NPI = Non-Hispanic Native Hawaiian or Pacific Islander
- Non-Hispanic Other = Non-Hispanic Some Other Race

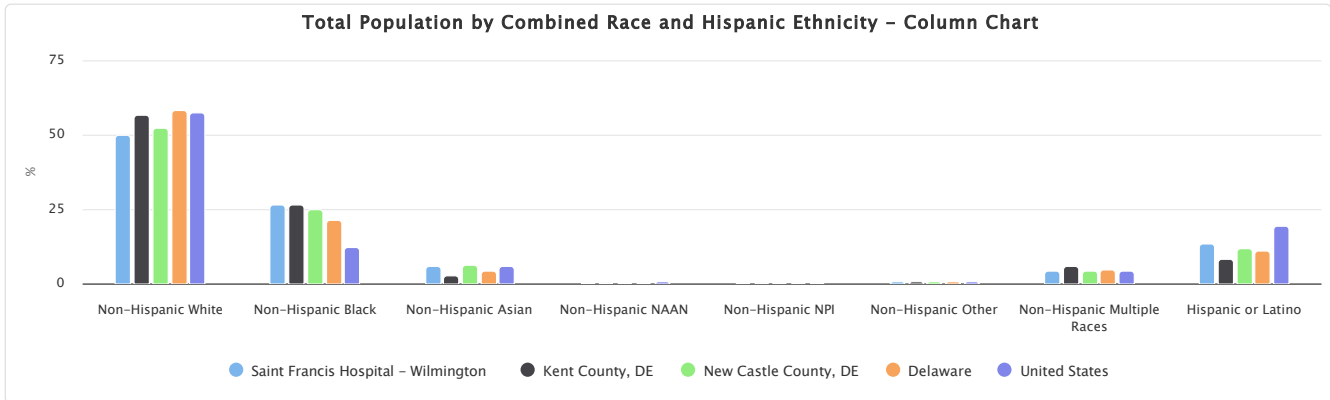

Report Area	Non-Hispanic White	Non-Hispanic Black	Non-Hispanic Asian	Non-Hispanic NAAN	Non-Hispanic NPI	Non-Hispanic Other	Non-Hispanic Multiple Races	Hispanic or Latino
Saint Francis Hospital - Wilmington	49.90%	26.37%	5.59%	0.05%	0.03%	0.45%	4.34%	13.27%
Kent County, DE	56.54%	26.40%	2.49%	0.26%	0.03%	0.52%	5.64%	8.11%
New Castle County, DE	52.34%	24.87%	6.18%	0.04%	0.03%	0.49%	4.25%	11.80%
Delaware	58.12%	21.37%	4.27%	0.12%	0.02%	0.51%	4.54%	11.05%
United States	57.39%	11.91%	5.88%	0.51%	0.17%	0.56%	4.25%	19.34%

Data Source: US Census Bureau, American Community Survey, 2020-24.

Total Population by Combined Race and Hispanic Ethnicity - Column Chart

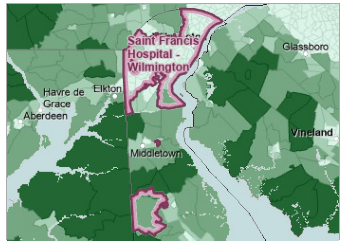

The chart below represents combined race and Hispanic ethnicity data in a column chart. This chart enables comparison between the report area and state and/or national averages.

Urban and Rural Population

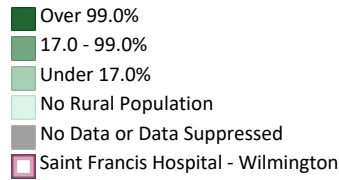

This indicator reports the percentage of population living in urban and rural areas as of 2020. Urban areas are identified using population density, count, and size thresholds. Urban areas also include territory with a high degree of impervious surface (development). Rural areas are all areas that are not urban. Of the report areas 437,943 population, 429,257 or 98.02% of the population is classified urban while 8,686 or 1.98% is rural.

Report Area	Total Population	Urban Population	Rural Population	Urban Population, Percent	Rural Population, Percent
Saint Francis Hospital - Wilmington	437,943	429,257	8,686	98.02%	1.98%
Kent County, DE	181,851	133,712	48,139	73.53%	26.47%
New Castle County, DE	570,719	535,938	34,781	93.91%	6.09%
Delaware	989,948	817,817	172,131	82.61%	17.39%
United States	331,449,281	265,149,027	66,300,254	80.00%	20.00%

[View larger map](#)

Population Living in Rural Areas, Percent by Tract, US Census Bureau 2020

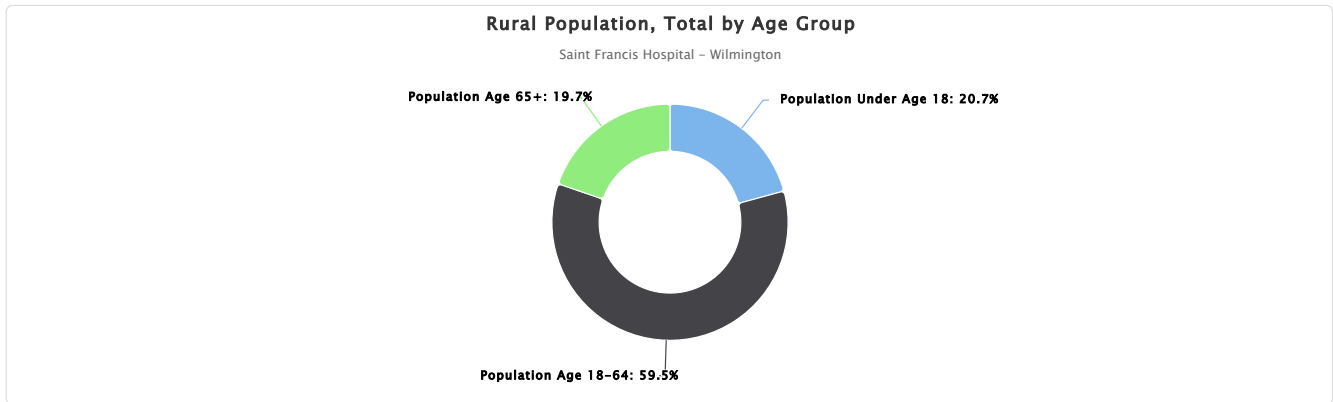

Rural Population, Total by Age Group

This indicator reports the total rural population of the report area by age group.

Report Area	Population Under Age 18	Population Age 18-64	Population Age 65+
Saint Francis Hospital - Wilmington	1,786	5,124	1,698
Kent County, DE	10,247	28,228	9,261
New Castle County, DE	6,970	21,606	5,895
Delaware	34,895	100,056	35,831
United States	13,901,034	38,682,984	13,426,319

Data Source: US Census Bureau, Decennial Census, 2020.

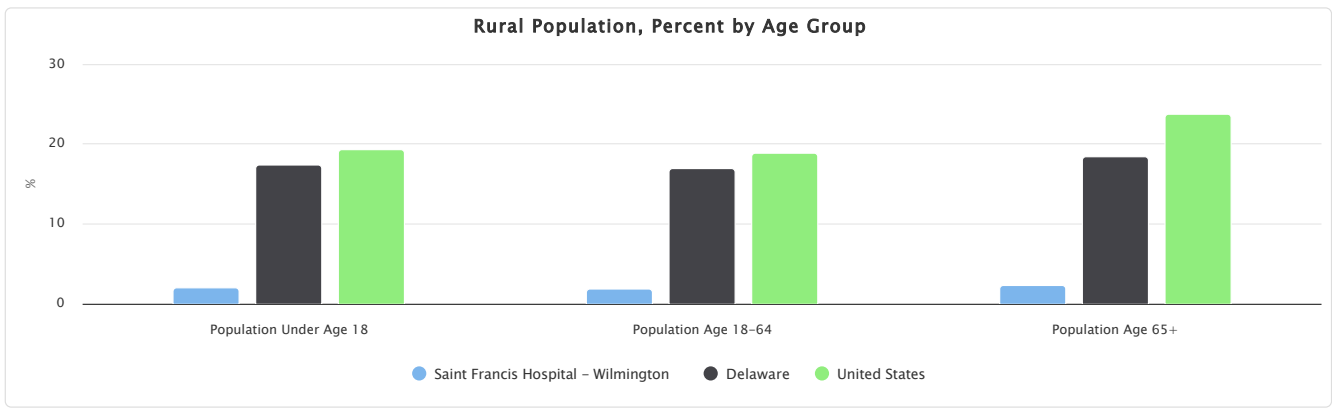

Rural Population, Percent by Age Group

This indicator reports the total rural population of the report area by age group.

The percentage values could be interpreted as, for example, "Of all the population under age 18 within the report area, the proportion of rural population is (value)."

Report Area	Population Under Age 18	Population Age 18-64	Population Age 65+
Saint Francis Hospital - Wilmington	1.99%	1.87%	2.35%
Kent County, DE	24.97%	26.35%	28.35%
New Castle County, DE	5.90%	6.06%	6.31%
Delaware	17.35%	16.99%	18.41%
United States	19.35%	18.91%	23.75%

Data Source: US Census Bureau, Decennial Census, 2020.

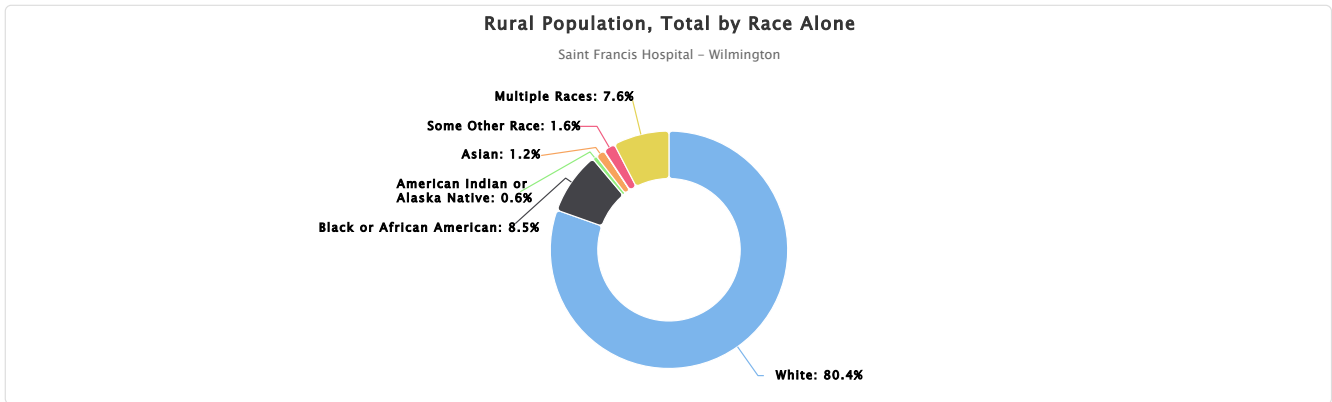

Rural Population, Total by Race Alone

This indicator reports the total rural population of the report area by race alone.

Report Area	White	Black or African American	American Indian or Alaska Native	Asian	Native Hawaiian or Pacific Islander	Some Other Race	Multiple Races
Saint Francis Hospital - Wilmington	6,988	736	53	107	6	139	661

United States	1.80%	4.56%	7.10%	10.81%	18.16%

Data Source: US Census Bureau, American Community Survey, 2020-24.

Healthcare Access

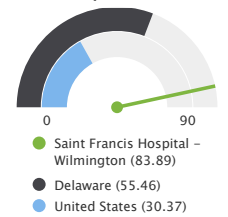

Access to Care - Addiction/Substance Abuse Providers

This indicator reports the number of providers who specialize in addiction or substance use disorder treatment, rehabilitation, addiction medicine, or providing methadone. The providers include Doctors of Medicine (MDs), Doctor of Osteopathic Medicine (DOs), and other credentialed professionals with a Center for Medicare and Medicaid Services (CMS) and a valid National Provider Identifier (NPI). The number of facilities that specialize in addiction and substance use disorder treatment are also listed (but are not included in the calculated rate). Data are from latest Centers for Medicare and Medicaid Services (CMS) National Plan and Provider Enumeration System (NPPES) Downloadable File.

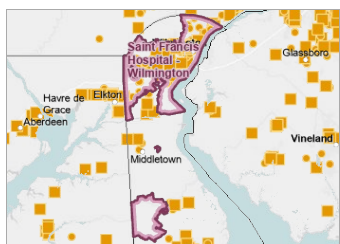

Within the report area there are 367 providers who specialize in addiction or substance use disorder. This represents 83.89 providers per 100,000 total population.

Report Area	Total Population (2020)	Number of Facilities	Number of Providers	Providers, Rate per 100,000 Population
Saint Francis Hospital - Wilmington	437,949	49	367	83.89
Kent County, DE	181,851	28	66	36.29
New Castle County, DE	570,719	58	375	65.71
Delaware	989,948	111	549	55.46
United States	334,735,155	24,080	101,670	30.37

Addiction/Substance Abuse Providers, Rate per 100,000 Population

Note: This indicator is compared to the state average.

Access to Care - Dentists

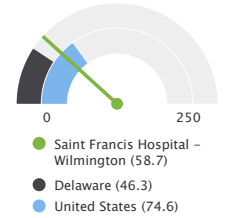

This indicator reports the number of dentists in the report area as a rate per 100,000 total population. This indicator includes all dentists - qualified as having a doctorate in dental surgery (D.D.S.) or dental medicine (D.M.D.), who are licensed by the state to practice dentistry and who are practicing within the scope of that license. Data are from the 2023 Area Health Resources File (AHRF) and were released by County Health Rankings & Roadmaps as a data update in September 2025.

Within the report area there are 261 dentists. This represents 58.7 providers per 100,000 total population.

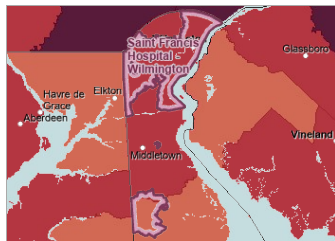

Note: Data are suppressed for counties with population greater than 4,000 and 0 dentists.

Report Area	Estimated Population (2023)	Number of Dentists	Ratio of Dental Providers to Population (1 Provider per x Persons)	Dentists, Rate (Per 100,000 Population)
Saint Francis Hospital - Wilmington	444,267	261	1,703.3	58.7
Kent County, DE	189,789	78	2,433.2	41.1
New Castle County, DE	578,592	342	1,691.8	59.1
Delaware	1,031,890	478	2,158.8	46.3
United States	334,914,895	249,826	1,340.6	74.6

Dentists Rate Per 100,000 Population

Note: This indicator is compared to the state average.

Access to Care - Mental Health Providers

This indicator reports the number of providers with a CMS National Provider Identifier (NPI) that specialize in mental health. Mental health providers include licensed clinical social workers and other credentialed professionals specializing in psychiatry, psychology, counseling, or child, adolescent, or adult mental health. The number of facilities that specialize in mental health are also listed (but are not included in the calculated rate). Data are from the latest Centers for Medicare and Medicaid Services (CMS) National Provider Identifier (NPI) downloadable file.

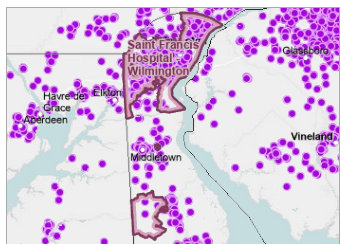

Within the report area there are 2,233 mental health providers with a CMS National Provider Identifier (NPI). This represents 509.79 providers per 100,000 total population.

Report Area	Total Population (2020)	Number of Facilities	Number of Providers	Providers, Rate per 100,000 Population

Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

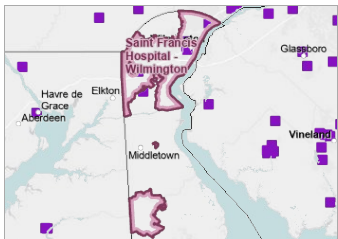

Within the report area, there are 6 Federally Qualified Health Centers. This means there is a rate of 1.37 Federally Qualified Health Centers per 100,000 total population.

Report Area	Total Population (2020)	Number of Federally Qualified Health Centers	Rate of Federally Qualified Health Centers per 100,000 Population

Health Professional Shortage Areas

This indicator reports the number and location of health care facilities designated as "Health Professional Shortage Areas" (HPSAs), defined as having shortages of primary medical care, dental or mental health providers. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

Within the report area, there are a total of 12 Health Professional Shortage Areas (HPSAs).

Report Area	Primary Care Facilities	Mental Health Care Facilities	Dental Health Care Facilities	Total HPSA Facility Designations
Saint Francis Hospital - Wilmington	4	4	4	12
Kent County, DE	0	0	0	0
New Castle County, DE	5	5	5	15
Delaware	7	7	7	21

Health Professional Shortage Areas - Dental Care

A **Health Professional Shortage Area (HPSA)** is a designation given by the Health Resources and Services Administration (HRSA) in the United States to identify geographic areas, populations, or facilities that lack sufficient health care professionals to meet the health needs of the community. HPSAs are categorized into three main types based on the specific type of health professional shortage:

Types of HPSA

- **Primary Care HPSA:** Areas with a shortage of primary care physicians, including family medicine, internal medicine, pediatrics, obstetrics, and gynecology.
- **Dental Health HPSA:** Areas with a shortage of dental health professionals, such as general and pediatric dentists.
- **Mental Health HPSA:** Areas with a shortage of mental health providers, including psychiatrists, clinical psychologists, clinical social workers, psychiatric nurse specialists, and marriage and family therapists.

This indicator reports the total population in the report area that is living in a dental health care Health Professional Shortage Area, regardless of the degree of shortage, or whether the HPSA covers the entire geographic area or a population subgroup. Indicator data are based on the following calculation:

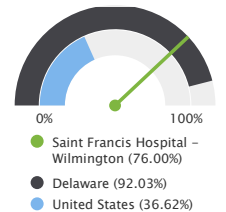

$$\text{Percentage} = \frac{[\text{HPSA Population}]}{[\text{Report Area Population}]} * 100$$

The population figures used in this calculation are from the 2024 American Community Survey 5-year Estimates.

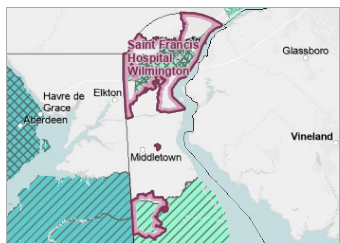

Within the report area, there are 497,514 people living in a dental health care Health Professional Shortage Area. This means 76.00% of people likely don't have reliable or affordable access to a dentist.

Report Area	Total Population (ACS 2024 5-Year Estimates)	Population Living in an Area Affected by a Dental Care HPSA	Percentage of Population Living in an Area Affected by a Dental Care HPSA
Saint Francis Hospital - Wilmington	654,660	497,514	76.00%
Kent County, DE	187,604	185,043	98.63%
New Castle County, DE	577,961	506,979	87.72%
Delaware	1,021,191	939,821	92.03%
United States	334,922,499	122,798,386	36.62%

Percentage of Population Living in an Area Affected by a Dental Care HPSA

Insurance - Population Receiving Medicaid

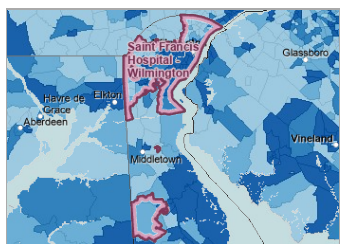

This indicator reports the percentage of the population with insurance enrolled in Medicaid (or other means-tested public health insurance). This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Population (For Whom Insurance Status is Determined)	Population with Any Health Insurance	Population Receiving Medicaid	Percent of Insured Population Receiving Medicaid
Saint Francis Hospital - Wilmington	435,867	406,999	92,492	22.73%
Kent County, DE	184,007	171,854	43,788	25.48%
New Castle County, DE	570,679	537,057	107,935	20.10%
Delaware	1,007,567	944,004	206,642	21.89%

Insurance - Uninsured Population

The lack of health insurance is considered a *key driver* of health status.

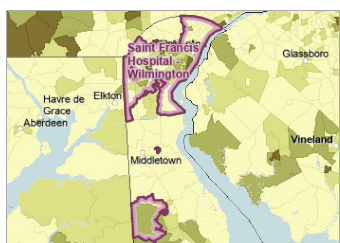

In the report area 6.62% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 6.31%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Report Area	Total Population (For Whom Insurance Status is Determined)	Uninsured Population	Uninsured Population, Percent
Saint Francis Hospital - Wilmington	435,867	28,868	6.62%
Kent County, DE	184,007	12,153	6.60%

Economic Stability

Area Deprivation Index

This indicator reports the average (population weighted) Area Deprivation Index (ADI) for the selected area. The Area Deprivation Index ranks neighborhoods and communities relative to all neighborhoods across the nation (National Percentile) or relative to other neighborhoods within just one state (State Percentile). The ADI is calculated based on 17 measures related to four primary domains (Education; Income & Employment; Housing; and Household Characteristics). The overall scores are measured on a scale of 1 to 100 where 1 indicates the lowest level of deprivation (least disadvantaged) and 100 is the highest level of deprivation (most disadvantaged).

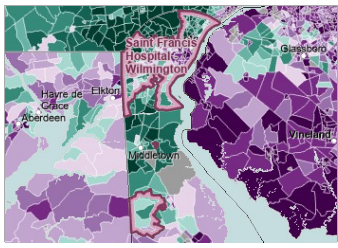

Report Area	Total Population (2020)	State Percentile	National Percentile
Saint Francis Hospital - Wilmington	437,943	57	48
Kent County, DE	181,851	59	49
New Castle County, DE	570,719	49	42
Delaware	4,728,221	49	63
United States	331,129,211	51	46

Area Deprivation Index Score (National Percentile)

[View larger map](#)

Area Deprivation Index (2023), State Decile by Block Group, UW Neighborhood Atlas 2023

Population Percentages by Tiered Area Deprivation Index

The chart and table below report the share of the report area’s total population living in neighborhoods grouped into four disadvantage levels based on the Area Deprivation Index (ADI) national percentile.

Neighborhoods are defined as census block groups (CBGs) and are assigned to an ADI quartile using their national percentile score:

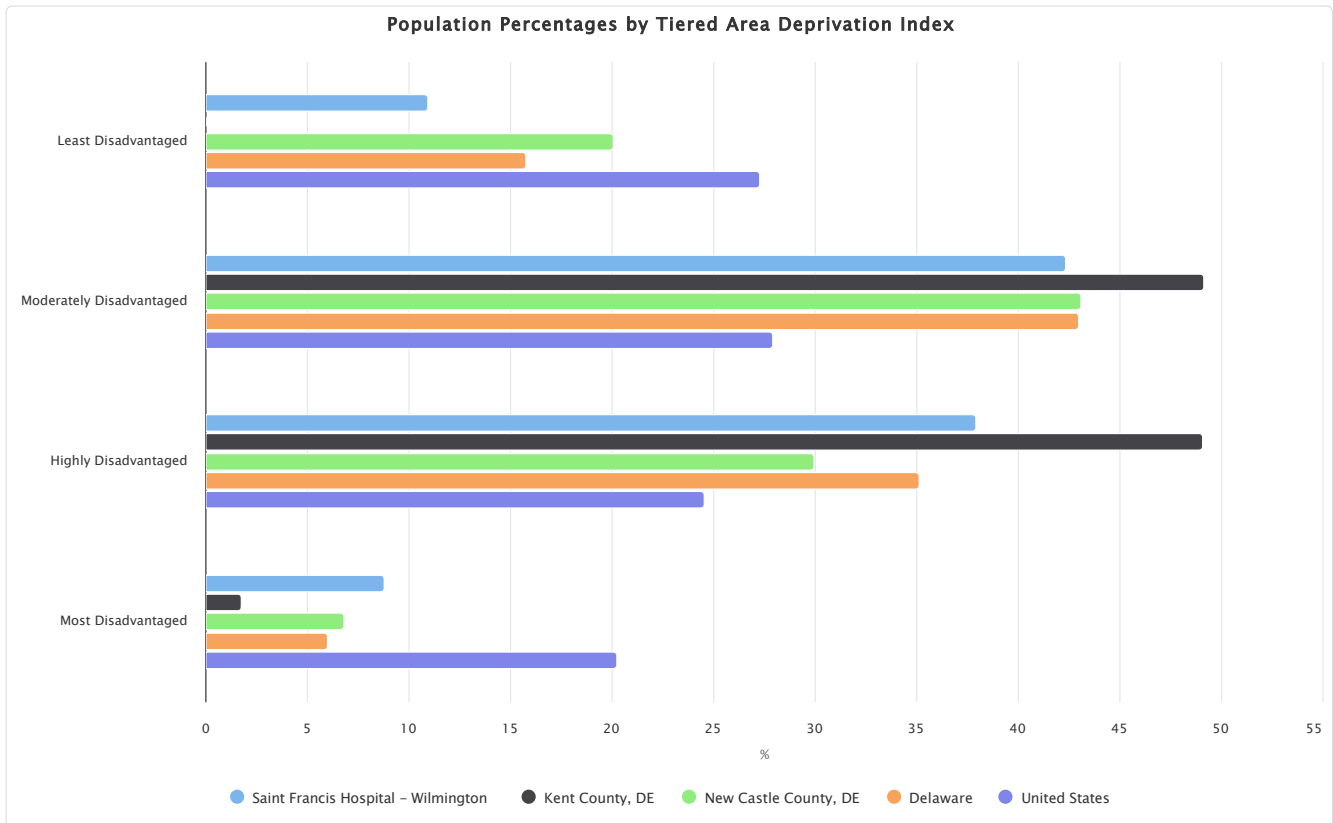

- **Least disadvantaged:** ADI percentile 0–25
- **Mid-low disadvantage:** ADI percentile 26–50
- **Mid-high disadvantage:** ADI percentile 51–75
- **Most disadvantaged:** ADI percentile 76–100

The formula (for each group) can be expressed as:

Percent of population in group = $(\text{Population living in neighborhoods in that ADI percentile range} \div \text{Total population in the report area}) \times 100$

Report Area	Least Disadvantaged	Moderately Disadvantaged	Highly Disadvantaged	Most Disadvantaged
Saint Francis Hospital - Wilmington	10.96%	42.33%	37.91%	8.80%
Kent County, DE	0.00%	49.13%	49.11%	1.77%
New Castle County, DE	20.09%	43.10%	29.95%	6.86%
Delaware	15.80%	43.02%	35.15%	6.03%
United States	27.28%	27.92%	24.55%	20.25%

Data Source: University of Wisconsin-Madison School of Medicine and Public Health, *Neighborhood Atlas*, 2023.

Employment - Jobs and Earnings by Sector

The number of jobs and total wage and salary earnings from employment in the report area are broken down by economic sector in this indicator output. These figures include both private and government employment. The sectors listed represent private employment except for the last table which includes all the earnings from jobs with local, state and federal government. A negative number means that overall business in that sector lost money for the year in the report area.

Employment - Unemployment Rate

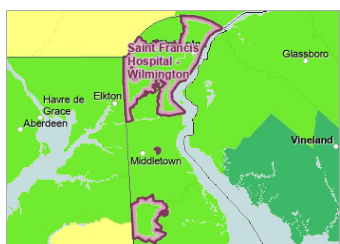

Total unemployment in the report area for the current month equals 11,808, or 5.0% of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Labor Force	Number Employed	Number Unemployed	Unemployment Rate
Saint Francis Hospital - Wilmington	237,267	225,458	11,808	5.0%

Food Insecurity - Food Insecure Children

This indicator reports the estimated percentage of the population under age 18 that experienced food insecurity at some point during the report year. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food.

Report Area	Population Under Age 18	Food Insecure Children, Total	Child Food Insecurity Rate
Saint Francis Hospital - Wilmington	95,088	17,224	18.1%
Kent County, DE	41,478	9,540	23%
New Castle County, DE	123,778	22,280	18%
Delaware	418,589	78,300	18.71%
United States	72,810,721	13,128,990	18.03%

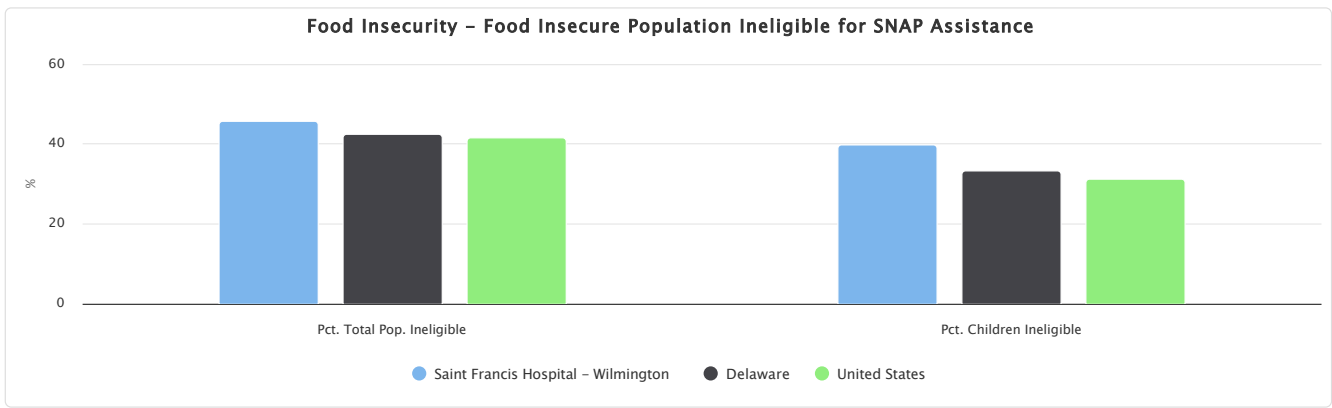

Data Source: Feeding America, 2023.

Food Insecurity - Food Insecure Population Ineligible for SNAP Assistance

This indicator reports the estimated percentage of the total population and the population under age 18 that experienced food insecurity at some point during the report year, but are ineligible for SNAP assistance. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food. Assistance eligibility is determined based on household income of the food insecure households relative to the maximum income-to-poverty ratio for SNAP.

Report Area	Food Insecure Population	Food Insecure Population Ineligible for Assistance, Percent	Food Insecure Children	Food Insecure Children Ineligible for Assistance, Percent
Saint Francis Hospital - Wilmington	52,552	45.8%	17,224	39.71%

Homeless Children and Youth

This indicator reports the number of children and youth experiencing homelessness enrolled in the public school system during the 2021-2022 school year. This data source reports the number of students experiencing homelessness, defined as individuals who lack a fixed, regular, and adequate nighttime residence. This includes those who are sharing the housing of others, living in motels, hotels, or camping grounds, staying in emergency transitional shelters, or are unsheltered. Data are aggregated to the report-area level based on school-district summaries where three or more children experiencing homelessness are counted.

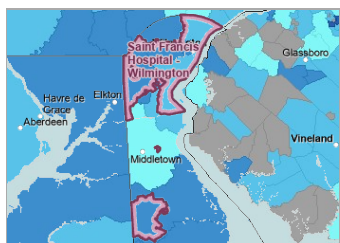

In the report area, of the 43,440 students enrolled in reported districts during the 2021-22 school year, there were 1,414 or 3.25% students experiencing homelessness, which is higher than the statewide rate of 2.85%.

Note: Data are available for 100.00% school districts in the report area, representing 100.00% of the public school student population.

Report Area	Students in All Districts	Students Reporting Experiencing Homelessness	Students Reporting Experiencing Homelessness, Percent	Districts Reporting	Students in Reported Districts
Saint Francis Hospital - Wilmington	43,440	1,414	3.25%	100.00%	100.00%

Students Experiencing Homelessness by Primary Nighttime Residence

This table and chart below report the number of students experiencing homelessness by their primary nighttime residence. Data represent students who were enrolled in the public school system during the 2021-2022 school year. The data are aggregated at the report-area level based on school district summaries where three or more students were counted.

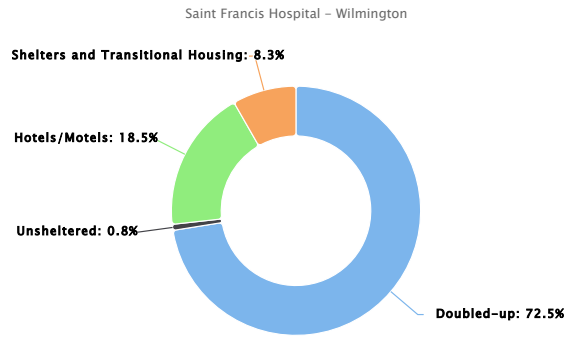

A brief description of each column is provided below:

- **Doubled-up:** Refers to doubled-up or shared housing due to loss of housing, economic hardship, or similar reasons.
- **Unsheltered:** Includes situations such as living in cars, parks, campgrounds, temporary trailers (including FEMA trailers), or abandoned buildings.
- **Hotels/Motels:** As indicated by the name, refers to stays in hotels or motels.
- **Shelters and Transitional Housing:** Refers to stays in shelters or transitional housing programs, as indicated.

Report Area	Total	Doubled-up	Unsheltered	Hotels/motels	Shelters and transitional housing

Homeless Children and Youth by School Year, 2018-19 through 2021-22

Income - Median Household Income

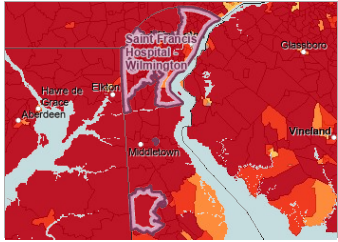

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, median household income is usually less than median family income. There are 176,408 households in the report area, with an average income of \$109,335 and a median income of \$84,263.

Report Area	Total Households	Average Household Income	Median Household Income
Saint Francis Hospital - Wilmington	176,408	\$109,335	\$84,263
Kent County, DE	71,424	\$92,801	\$74,477

In the report area 25.41% or 110,057.00 children are living in households with income below 200% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

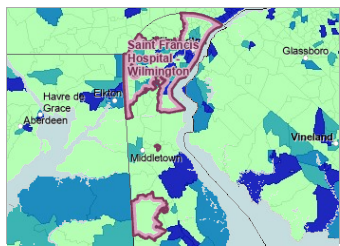

Note: The total population measurements for poverty reports are lower than population totals for some other indicators, as poverty data collection does not include people in group quarters. See "Show more details" for more information.

Report Area	Total Population Under Age 18	Population Under Age 18 Below 200% FPL	Population Under Age 18 Below 200% FPL, Percent

Poverty - Children Eligible for Free/Reduced Price Lunch

This indicator reports the percentage of public school students eligible for free or reduced price lunches. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs. Additionally, when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

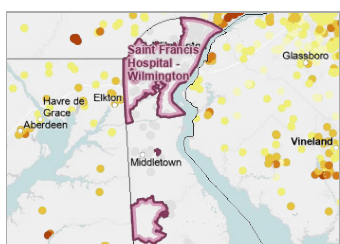

Note: States with more than 80% records labeled as "not reported" are suppressed for all geographic areas, including hospital service area, census tract, zip code, school district, county, state, etc.

Report Area	Total Students	Students Eligible for Free or Reduced Price Lunch	Students Eligible for Free or Reduced Price Lunch, Percent

Students Eligible for Free or Reduced-Price Lunch, NCES CCD 2023-24

Children Eligible for Free or Reduced Price Lunch by School Year, 2013-14 through 2022-23

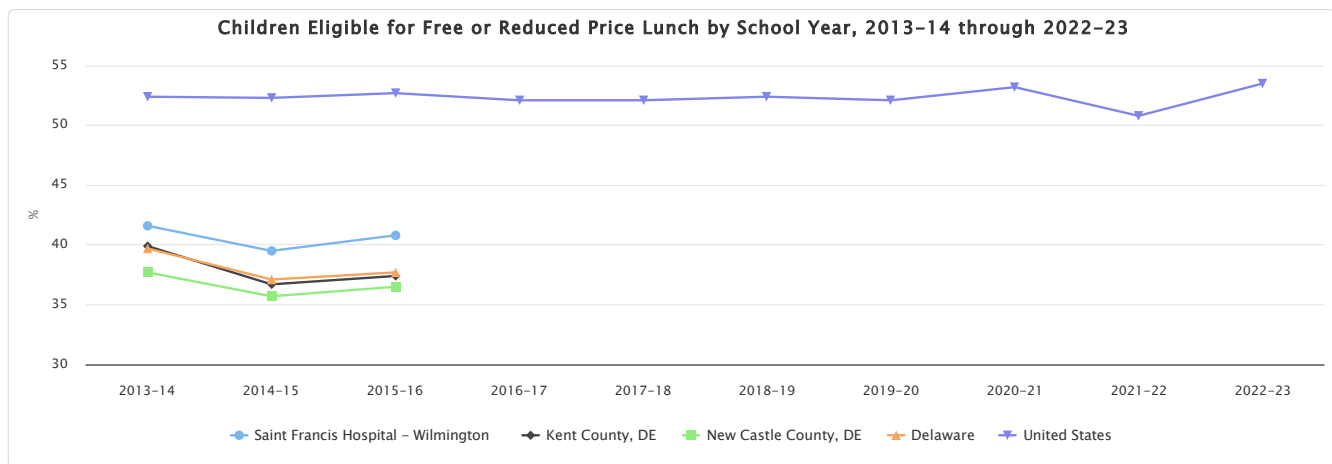

The table below shows local, state, and national trends in student free and reduced lunch eligibility by percent.

Note: The states below have more than 80% public schools labeled as "not reported" in 2022-2023. For consistency, these states still have their values calculated with the limited records on all geographic levels (unless there is not a single record reported in the selected area). Use with caution when comparing to other years. This issue might occur in other states/years as well.

For 2022-2023, watch out for Delaware, District of Columbia, Massachusetts, Montana, Tennessee, West Virginia, American Samoa, and Guam.

Poverty - Population Below 200% FPL

In the report area 25.41% or 110,057.00 individuals for whom poverty status is determined are living in households with income below 200% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

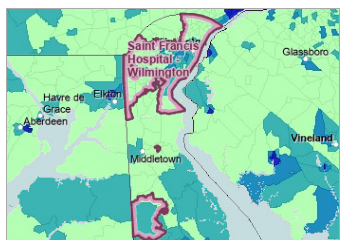

Note: The total population measurements for poverty reports are lower than population totals for some other indicators, as poverty data collection does not include people in group quarters. See "Show more details" for more information.

Report Area	Total Population	Population with Income Below 200% FPL	Population with Income Below 200% FPL, Percent

Education

Access - Head Start

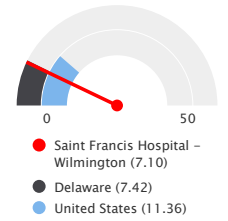

Head Start is a program designed to help children from birth to age five who come from families at or below poverty level. The program's goal is to help children become ready for kindergarten while also providing the needed requirements to thrive, including health care and

food support.

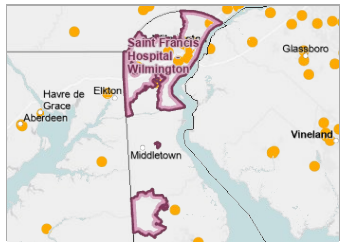

This indicator reports the number and rate of Head Start program facilities per 10,000 children under age 5. Head Start facility data is acquired from the US Department of Health and Human Services (HHS) 2024 Head Start locator. Population data is from the 2020 US Decennial Census. The report area has a total of 17 Head Start programs with a rate of 7.10 per 10,000 children under 5 years old.

Report Area	Children Under Age 5	Total Head Start Programs	Head Start Programs, Rate (Per 10,000 Children Under Age 5)
Saint Francis Hospital - Wilmington	23,418	17	7.10
Kent County, DE	10,762	11	10.22
New Castle County, DE	29,685	18	6.06
Delaware	51,230	38	7.42

Chronic Absenteeism

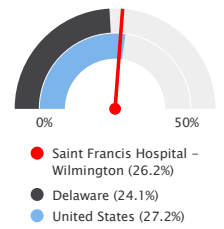

This indicator reports the rate of chronic absenteeism (students absent 10% or more school days during the school year 2022-2023). In

the report area 26.2% or 11,195 children were chronically absent during the 2022-23 school year.

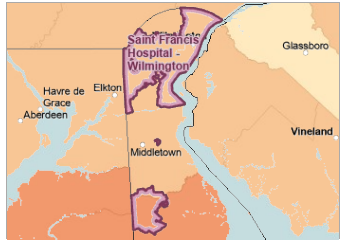

Note: Since the data are protected by adding or subtracting one student for cell sizes less than or equal to four and random data swapping for cell sizes less than or equal to three, the instances of zero to five might indicate true values or recoded data. Interpret with caution.

Report Area	Students Enrolled	Number Chronically Absent	Chronic Absence Rate
Saint Francis Hospital - Wilmington	42,805	11,195	26.2%
Kent County, DE	31,010	8,157	26.3%
New Castle County, DE	78,939	18,279	23.2%

Social Support & Community Context

Childhood Opportunity Index

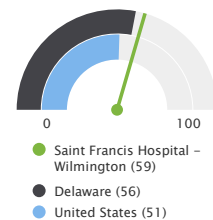

The **Child Opportunity Index (COI) 3.0** measures and maps the quality of resources and conditions that support children’s healthy development in the neighborhoods where they live. Based on 44 component indicators spanning 3 domains (education, health and

environment, and social and economic conditions) it also considers child population counts by race and Hispanic ethnicity. COI 3.0 provides a comprehensive view using 14 subdomains that capture various factors influencing well-being. Data is available for almost all U.S. census tracts, ZIP codes, and counties from 2012 to 2023, and the index values range from 1 (no opportunity) to 100 (maximum opportunity), helping to identify areas where children have fewer resources and where improvement is needed.

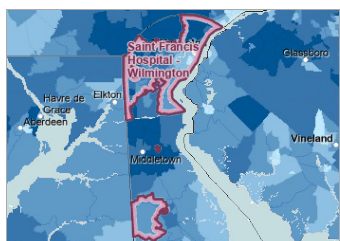

This indicator in COI 3.0 includes measures of the total population of children aged 0-17 (91,409), the Child Opportunity Index In-State Score (47), and the Child Opportunity Index National Score (59).

Report Area	Total Population Aged 0-17	Child Opportunity Index, In-State Score	Child Opportunity Index, National Score

Social Vulnerability Index

The degree to which a community exhibits certain social conditions, including high poverty, low percentage of vehicle access, or crowded households, may affect that community's ability to prevent human suffering and financial loss in the event of disaster. These factors describe a community's social vulnerability.

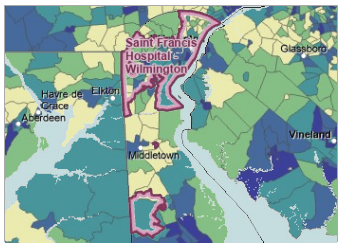

The social vulnerability index is a measure of the degree of social vulnerability in counties and neighborhoods across the United States, where a higher score indicates higher vulnerability. The report area has a social vulnerability index score of 0.48, which is less than the state average of 0.57.

Report Area	Total Population	Socioeconomic Theme Score	Household Composition Theme Score	Minority Status Theme Score	Housing & Transportation Theme Score	Social Vulnerability Index Score
Saint Francis Hospital - Wilmington	389,157	0.46	0.52	0.58	0.46	0.48

Neighborhood & Physical Environment

Air Quality - Particulate Matter 2.5

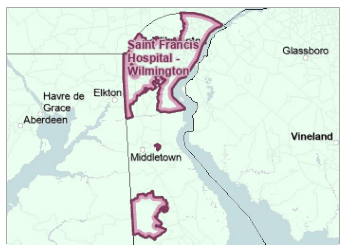

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

Report Area	Total Population	Average Daily Ambient Particulate Matter 2.5	Number of Days Exceeding NAAQS Standards	Percentage of Days Exceeding Standards, Crude Average	Percentage of Days Exceeding Standards, Pop. Adjusted Average

Built Environment - Broadband Access

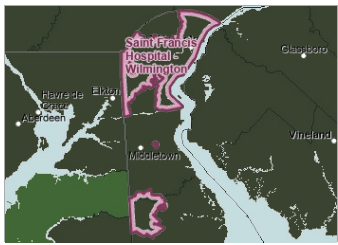

This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. These data represent both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included.

Report Area	Total Number of Broadband Serviceable Locations	Access to DL Speeds >= 25MBPS and UL Speeds >= 3 MBPS	Access to DL Speeds >= 100MBPS and UL Speeds >= 20 MBPS
Saint Francis Hospital - Wilmington	142,542	99.97%	99.83%
Kent County, DE	69,841	99.69%	96.59%
New Castle County, DE	188,601	99.92%	99.78%
Delaware	405,376	99.81%	98.13%
United States	116,414,099	97.08%	94.70%

percentage of Population with Access to Broadband Internet (DL Speeds > 25MBPS)

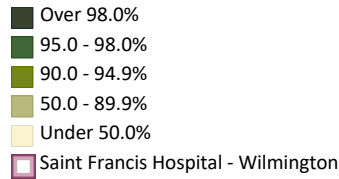

Note: This indicator is compared to the state average.
Data Source: FCC FABRIC Data. Additional data analysis by CARES, June, 2025.

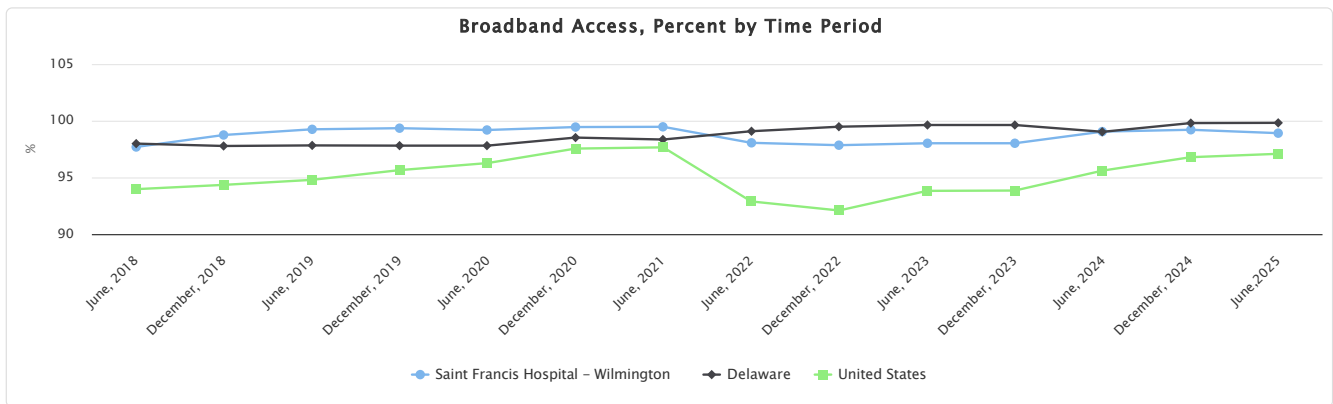

[View larger map](#)

Broadband Access - FABRIC Locations, 25/3+ MBPS, Percent by County, FCC June, 2025

Broadband Access, Percent by Time Period

The table below displays temporal trends in high-speed internet availability as the percent of the population with access to broadband in the indicated area. Because the FCC switched from the 477 data to the location based Fabric between June 2021 and June 2022, comparison between years should be done with caution.

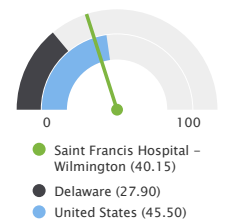

Built Environment - Park Access

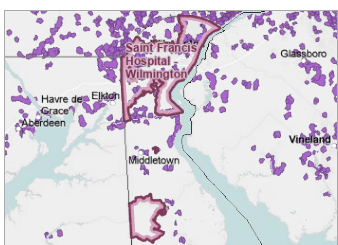

This indicator displays the number of people who live within a 10-minute walk from a park

Report Area	Total Population (2020)	Population Within a 10-Minute Walk	Percent of Population Within a 10-Minute Walk

Food Environment - Fast Food Restaurants

This indicator reports the number of fast food restaurants per 100,000 population. The prevalence of fast food restaurants provides a measure of both access to healthy food and environmental influences on dietary behaviors. Fast food restaurants are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating.

Note: Counts of establishments < 3 are suppressed.

Food Environment - Grocery Stores and Supermarkets

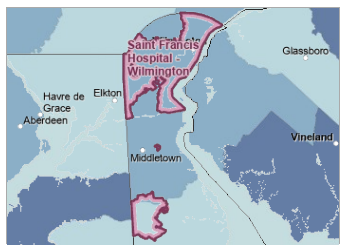

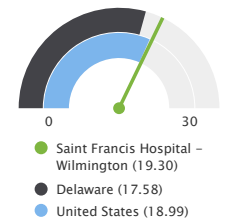

Healthy dietary behaviors are supported by access to healthy foods, and Grocery Stores are a major provider of these foods. There are 85 grocery establishments in the report area, a rate of 19.30 per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Delicatessen-type establishments are also included. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores, are excluded.

Report Area	Total Population (2020)	Number of Establishments	Establishments, Rate per 100,000 Population
Saint Francis Hospital - Wilmington	440,508	85	19.30

Food Environment - Low Income & Low Food Access

This indicator reports the percentage of the low income population with low food access. Low food access is defined as living more than 1 mile (urban) or 10 miles (rural) from the nearest supermarket, supercenter, or large grocery store. Data are from the April 2021 [Food Access Research Atlas](#) dataset. This indicator is relevant because it highlights populations and geographies facing food insecurity.

24.30% of the low-income population in the report area have low food access. The total low-income population in the report area with low food access is 28,815.

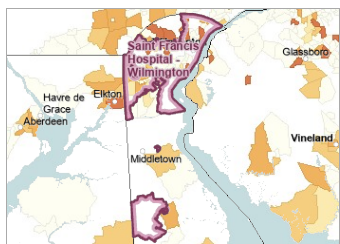

Report Area	Total Population	Low Income Population	Low Income Population with Low Food Access	Percent Low Income Population with Low Food Access
Saint Francis Hospital - Wilmington	432,964	118,607	28,815	24.30%

Housing Costs - Cost Burden (30%)

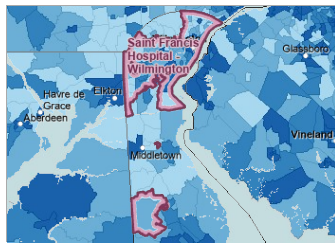

This indicator reports the percentage of the households where housing costs are 30% or more of total household income. This indicator

provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels. Of the 176,408 total households in the report area, 49,435 or 28.02% of the population live in cost burdened households.

Report Area	Total Households	Cost-Burdened Households	Cost-Burdened Households, Percent
Saint Francis Hospital - Wilmington	176,408	49,435	28.02%
Kent County, DE	71,424	20,832	29.17%

Cost-Burdened Households by Hispanic Ethnicity Alone, Percent of Total

This indicator reports the percentage of households that spend more than 30% of their household income on housing costs by Hispanic ethnicity alone during 2020-2024, according to the American Community Survey (ACS). Note that the data for this indicator are only reported for households where housing costs, income earned, and ethnicity were identified in the American Community Survey.

Within the report area, there were 5,713 cost-burdened households of Hispanic or Latino origin, representing 11.56% of the total cost-burdened households. There were 43,722 cost-burdened households of non-Hispanic or Latino origin in the report area, representing 88.44% of the total cost-burdened households.

Report Area	Hispanic or Latino	Not Hispanic or Latino	Hispanic or Latino, Percent	Not Hispanic or Latino, Percent
Saint Francis Hospital - Wilmington	5,713	43,722	11.56%	88.44%

Housing Quality - Overcrowding

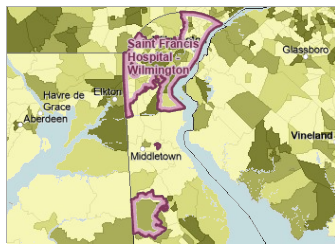

This indicator reports data on overcrowded housing from the latest 5-year American Community Survey. The Census Bureau has no official definition of crowded units, but this report considers units with more than one occupant per room to be crowded.

Report Area	Total Occupied Housing Units	Overcrowded Housing Units	Percentage of Housing Units Overcrowded
Saint Francis Hospital - Wilmington	176,408	4,239	2.40%
Kent County, DE	71,424	1,177	1.65%

Overcrowded Housing (Over 1 Person/Room), Percent by Tract, ACS 2020-24

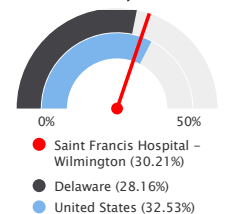

Housing Quality - Substandard Housing

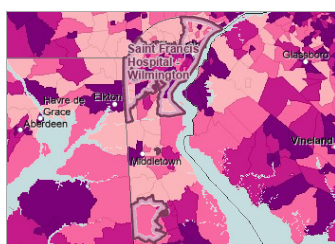

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard. Of the 218,749 total occupied housing units in the report area, 66,074 or 30.21% have one or more substandard conditions.

Report Area	Total Occupied Housing Units	Occupied Housing Units with One or More Substandard Conditions	Occupied Housing Units with One or More Substandard Conditions, Percent
Saint Francis Hospital - Wilmington	218,749	66,074	30.21%
Kent County, DE	71,424	21,960	30.75%

Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

Report Area	Occupied Housing Units	Housing Units Lacking Complete Plumbing Facilities	Housing Units Lacking Complete Plumbing Facilities, Percent
Saint Francis Hospital - Wilmington	176,408	577	0.33%
Kent County, DE	71,424	110	0.15%
New Castle County, DE	224,173	806	0.36%
Delaware	402,038	1,111	0.28%
United States	129,227,496	523,448	0.41%

Data Source: US Census Bureau, American Community Survey, 2020-24.

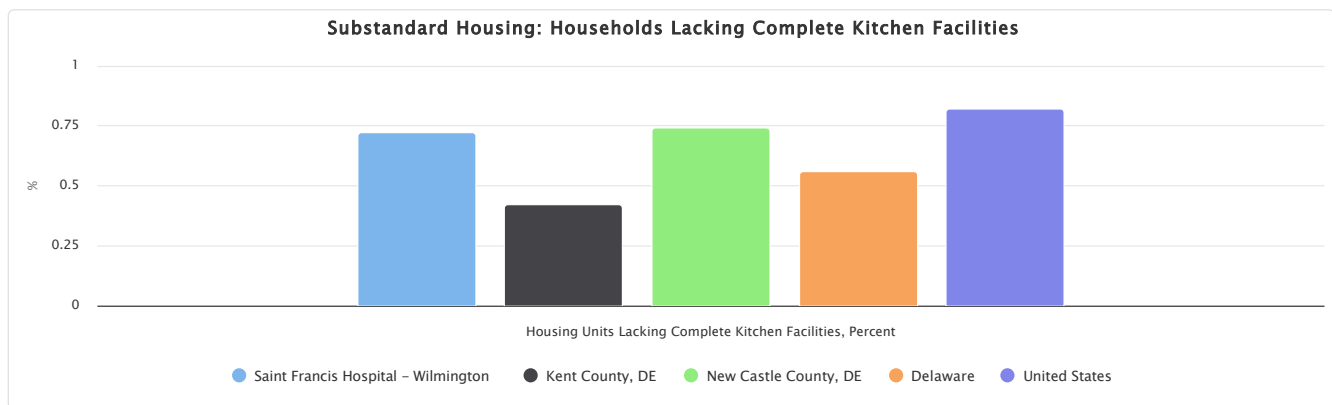

Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

Report Area	Occupied Housing Units	Housing Units Lacking Complete Kitchen Facilities	Housing Units Lacking Complete Kitchen Facilities, Percent
Saint Francis Hospital - Wilmington	176,408	1,262	0.72%
Kent County, DE	71,424	303	0.42%

United States	129,227,496	1,064,164	0.82%

Data Source: US Census Bureau, American Community Survey, 2020-24.

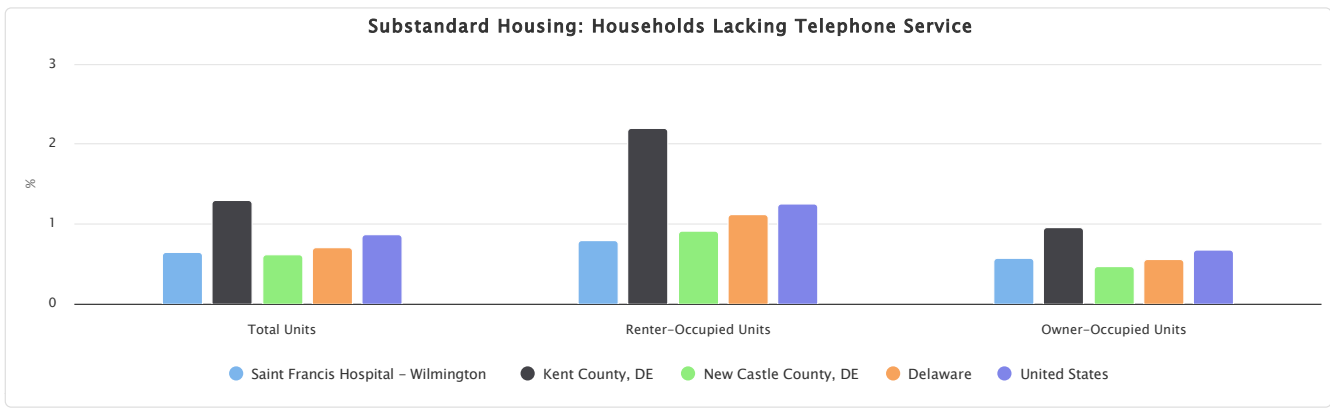

Substandard Housing: Households Lacking Telephone Service

A telephone must be in working order and service available in the house, apartment, or mobile home that allows the respondent to both make and receive calls. Households that have cell-phones (no land-line) are counted as having telephone service available. Households whose service has been discontinued for nonpayment or other reasons are not counted as having telephone service available.

Report Area	Housing Units Lacking Telephone Service	Housing Units Lacking Telephone Service	Owner-Occupied Units Lacking Telephone Service	Owner-Occupied Units Lacking Telephone Service	Renter-Occupied Units Lacking Telephone Service	Renter-Occupied Units Lacking Telephone Service
Saint Francis Hospital - Wilmington	1,145	0.65%	661	0.57%	484	0.79%

Data Source: US Census Bureau, American Community Survey, 2020-24.

Tenure - Owner-Occupied Housing

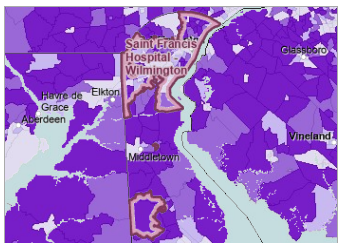

Tenure provides a measurement of home ownership, which has served as an indicator of the nation’s economy for decades. This data covers all occupied housing units, which are classified as either owner occupied or renter occupied. These data are used to aid in the distribution of funds for programs such as those involving mortgage insurance, rental housing, and national defense housing. Data on tenure allows planners to evaluate the overall viability of housing markets and to assess the stability of neighborhoods. The data also serve in understanding the characteristics of owner occupied and renter occupied units to aid builders, mortgage lenders, planning officials, government agencies, etc., in the planning of housing programs and services.

Owner-Occupied Housing

A housing unit is owner-occupied if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. The unit also is considered owned with a mortgage if it is built on leased land and there is a mortgage on the unit. Mobile homes occupied by owners with installment loan balances also are included in this category.

Report Area	Total Occupied Housing Units	Owner-Occupied Housing Units	Percent Owner-Occupied Housing Units
Saint Francis Hospital - Wilmington	176,408	115,103	65.25%
Kent County, DE	71,424	51,808	72.54%

Health Outcomes & Behaviors

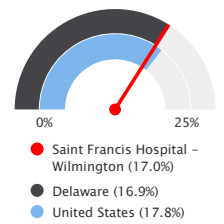

30-Day Hospital Readmissions

This indicator reports the number and rate of 30-day hospital readmissions among Fee-for-Service (FFS) Medicare beneficiaries. Hospital readmissions are unplanned visits to an acute care hospital within 30 days after discharge from a hospitalization. Patients may have unplanned readmissions for any reason, however readmissions within 30 days are often related to the care received in the hospital, whereas readmissions over a longer time period have more to do with other complicating illnesses, patients' own behavior, or care provided to patients after hospital discharge¹.

In the latest reporting period there were 77,060 FFS Medicare beneficiaries in the report area. 1,872, or 17.0% of hospitalizations resulted in a 30-day hospital readmission. The rate of readmissions in the report area was higher than the state rate of 16.9% during the same time period.

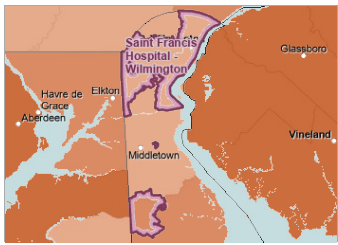

Report Area	Medicare FFS Beneficiaries	30-Day Hospital Readmissions	30-Day Hospital Readmissions, Rate
Saint Francis Hospital - Wilmington	77,060	1,872	17.0%
Kent County, DE	38,893	931	18.1%
New Castle County, DE	99,946	2,429	16.9%

High Blood Pressure

This indicator reports the percentage of adults age 18 and older who reported ever having been told by a doctor, nurse, or other health professional that they have high blood pressure (HTN). Women who were told high blood pressure only during pregnancy and those who were told they had borderline hypertension were not included.

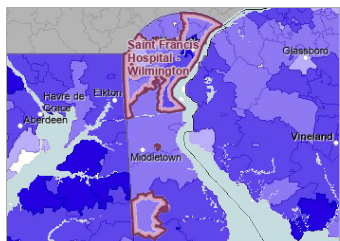

Within the report area, 35.3% of adults age 18+ reported having high blood pressure.

Report Area	Total Population	Adults Age 18+ with HTN (Crude)	Adults Age 18+ with HTN (Age-Adjusted)
Saint Francis Hospital - Wilmington	437,943	35.3%	No data
Kent County, DE	189,789	39.5%	36.0%
New Castle County, DE	578,592	35.2%	32.1%

Life Expectancy

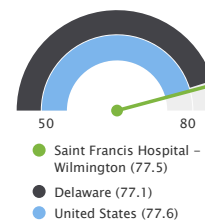

This indicator reports the average life expectancy at birth (age-adjusted to 2000 standard). Data are from the National Center for Health Statistics Mortality Files (2021–2023) and were released by County Health Rankings & Roadmaps as a supplemental update in November 2025.

Of the total 411,080 population in the report area, the average life expectancy during the 2021-23 three-year period is 77.5, which is higher than the statewide rate of 77.1.

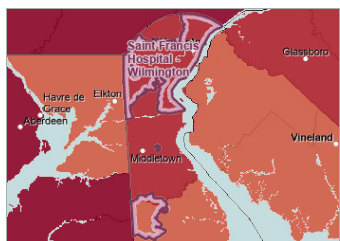

Note: Data are suppressed for counties with fewer than 5,000 population-years-at-risk in the time frame.

Report Area	Total Population (3-year Avg.)	Life Expectancy at Birth (2021-23)
Saint Francis Hospital - Wilmington	411,080	77.5
Kent County, DE	172,814	75.2
New Castle County, DE	535,564	77.5
Delaware	934,899	77.1

Maternal and Child Health - Breastfeeding

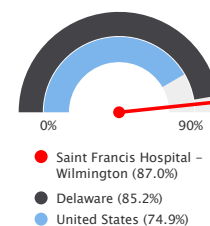

This indicator reports the estimated percentage of infants who were breastfed any amount at six months of age between 2020 and 2022. Data are acquired from the Health Resources and Services Administration (HRSA) Maternal and Infant Health Mapping Tool.

Within the report area, there are 4,099 or 87.0% infants who were breastfed any amount at six months of age between 2020 and 2022, which is higher than the state average of 85.2%.

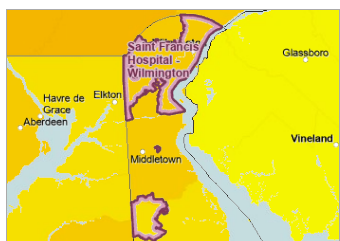

Note: Data are suppressed for counties with fewer than 10 live births or 10 events in the county and its adjacent neighbors in the time period.

Report Area	Live Births	Breastfeeding Infants, Total	Breastfeeding Infants, Percent
Saint Francis Hospital - Wilmington	4,710	4,099	87.0%
Kent County, DE	2,115	1,780	84.2%
New Castle County, DE	6,127	5,336	87.1%

Breastfeeding Initiation, Percent by County, MCHB 2020-2022

Maternal and Child Health - Lack of Prenatal Care

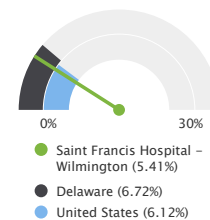

This indicator reports the percentage of women who did not obtain prenatal care until the 7th month (or later) of pregnancy or who didn't have any prenatal care, as of all who gave birth during the three year period from 2017 to 2019. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Within the report area, of the total births of 14,416 during 2017 and 2019, births with late or no prenatal care was 779 or 5.41%. This is lower than the national average rate of 6.12%.

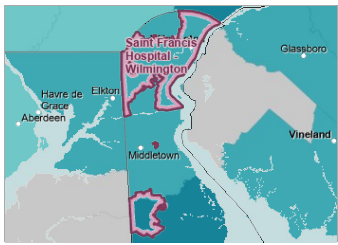

Note: Data are suppressed for counties with population less than 100,000 or when the birth counts represent fewer than ten persons.

Report Area	Total Births	Births with Late/No Care	% of Births with Late/No Care
Saint Francis Hospital - Wilmington	14,416	779	5.41%
Kent County, DE	6,330	522	8.25%
New Castle County, DE	18,763	1,002	5.34%
Delaware	32,038	2,154	6.72%
United States	11,394,752	697,581	6.12%

Data Source: Centers for Disease Control and Prevention, CDC - National Vital Statistics System. Accessed via CDC WONDER. Centers for Disease Control and Prevention, Wide-Ranging Online Data for Epidemiologic Research. 2017-19.

Maternal and Child Health - Low Birth Weight

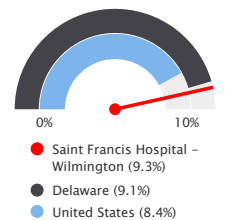

This indicator reports the percentage of live births where the infant weighed less than 2,500 grams (approximately 5 lbs., 8 oz.). These data are reported for a 7-year aggregated time period. Data were from the National Center for Health Statistics - Natality Files (2017-2023) and are used for the 2025 County Health Rankings.

Within the report area, there were 3,076 infants born with low birth weight. This represents 9.3% of the total live births.

Note: Data are suppressed for counties with fewer than 10 low birthweight births in the reporting period.

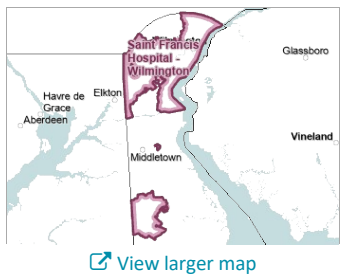

Report Area	Total Live Births	Low Birthweight Births	Low Birthweight Births, Percentage
Saint Francis Hospital - Wilmington	33,089	3,076	9.3%
Kent County, DE	14,802	1,383	9.3%

United States	7.0%	14.3%	8.2%	8.9%	8.6%	7.6%

Data Source: University of Wisconsin Population Health Institute, County Health Rankings, 2017-2023.

Maternal and Child Health - Smoking During Pregnancy

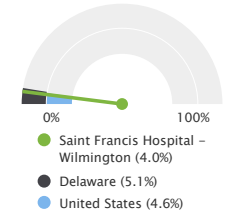

This indicator reports the estimated percentage of live births where maternal cigarette smoking was reported during any trimester of pregnancy between 2020 and 2022. Data are acquired from the Health Resources and Services Administration (HRSA) Maternal and Infant Health Mapping Tool.

Within the report area, there are 186 or 4.0% live births to women smoking during pregnancy between 2020 and 2022, which is lower than the state average of 5.1%.

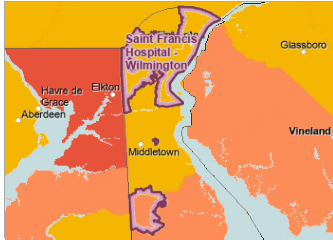

Note: Data are suppressed for counties with fewer than 10 live births or 10 events in the county and its adjacent neighbors in the time period.

Report Area	Total Resident Live Births	Births to Mothers that Smoked During Pregnancy	Births to Mothers that Smoked During Pregnancy, Percent

Mortality - Cancer

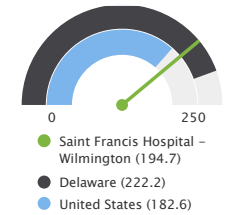

This indicator reports the 2020-2024 five-year average rate of death due to malignant neoplasm (cancer) per 100,000 population. Figures are reported as crude rates. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because cancer is a leading cause of death in the United States.

Within the report area, there are a total of 4,299 deaths due to cancer. This represents a crude death rate of 194.7 per every 100,000 total population.

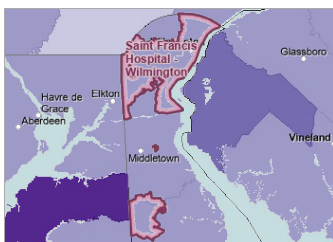

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2020-2024 Average	Five Year Total Deaths, 2020-2024 Total	Crude Death Rate (Per 100,000 Population)
Saint Francis Hospital - Wilmington	441,511	4,299	194.7

Mortality - Coronary Heart Disease

This indicator reports the 2020-2024 five-year average rate of death due to coronary heart disease (ICD10 Codes I20-I25) per 100,000 population. Figures are reported as crude rates. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because coronary heart disease is a leading cause of death in the United States.

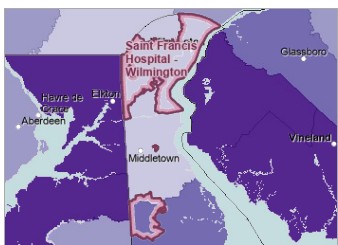

Within the report area, there are a total of 2,060 deaths due to coronary heart disease. This represents a crude death rate of 93.3 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2020-2024 Average	Five Year Total Deaths, 2020-2024 Total	Crude Death Rate (Per 100,000 Population)

Mortality - Deaths of Despair

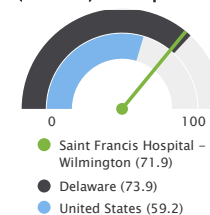

This indicator reports average rate of death due to intentional self-harm (suicide), alcohol-related disease, and drug overdose, also known as "deaths of despair", per 100,000 population. Figures are reported as crude rates. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because death of despair is an indicator of poor mental health.

Within the report area, there were 1,586 deaths of despair. This represents a crude death rate of 71.9 per every 100,000 total population.

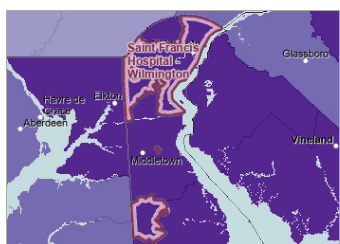

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2020-2024 Average	Five Year Total Deaths, 2020-2024 Total	Crude Death Rate (Per 100,000 Population)

Mortality - Drug Poisoning

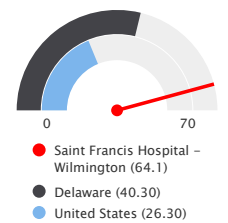

This indicator reports information about drug overdose from the National Vital Statistics System (NVSS), compiled by the CDC's National Center for Health Statistics. This system includes information from death certificates completed by state vital records offices, covering causes of death reported by physicians, medical examiners, and coroners. Data are presented as rates per 100,000 people at national, state, and county levels*. In areas with few reported deaths (1-9), models are used to estimate mortality rates.

Within Saint Francis Hospital - Wilmington, there are an estimated 64.1 deaths due to drug overdose per every 100,000 total population.

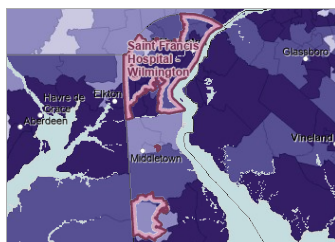

*Special tabulations of census tract clusters are also available (see map for details).

Mortality - Homicide

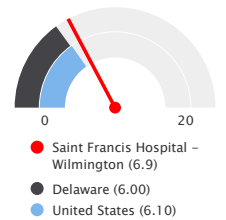

This indicator reports information about homicide deaths from the National Vital Statistics System (NVSS), compiled by the CDC's National Center for Health Statistics. This system includes information from death certificates completed by state vital records offices, covering causes of death reported by physicians, medical examiners, and coroners. Data are presented as rates per 100,000 people at national, state, and county levels*. In areas with few reported deaths (1-9), models are used to estimate mortality rates.

Within Saint Francis Hospital - Wilmington, there are an estimated 6.9 deaths due to homicide per 100,000 population. Of these, an estimated 5.3 deaths per 100,000 involve a firearm.

*Special tabulations of census tract clusters are also available (see map for details).

Mortality - Infant Mortality

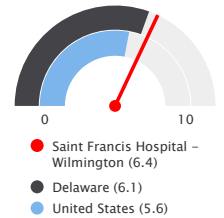

This indicator reports information about infant mortality, which is defined as the number of all infant deaths (within 1 year) per 1,000 live births. Data are from the National Center for Health Statistics Mortality Files (2017–2023) and were released by County Health Rankings & Roadmaps as a supplemental update in November 2025.

Within the report area, 210 infants died during the 2017-23 seven-year period. This represents 6.4 deaths per 1,000 live births.

Note: Data are suppressed for counties with fewer than 20 infant deaths in the time frame.

Mortality - Lung Disease

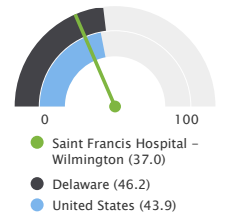

This indicator reports the 2020-2024 five-year average rate of death due to chronic lower respiratory disease per 100,000 population. Figures are reported as crude rates. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because lung disease is a leading cause of death in the United States.

Within the report area, there are a total of 818 deaths due to lung disease. This represents a crude death rate of 37.0 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

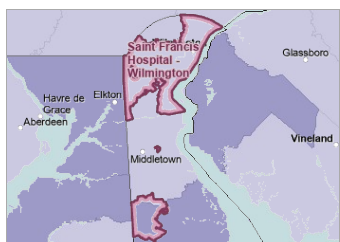

Report Area	Total Population, 2020-2024 Average	Five Year Total Deaths, 2020-2024 Total	Crude Death Rate (Per 100,000 Population)

Mortality - Motor Vehicle Crash

Motor vehicle crash deaths are preventable and are a leading cause of death among young persons. This indicator reports the crude rate of people killed in motor vehicle crashes per 100,000 population. Fatality counts are based on the location of the crash and not the decedent's residence.

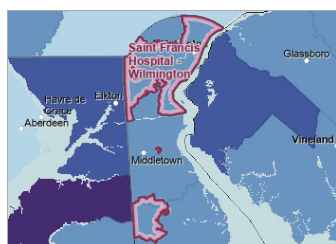

Within the report area, there are a total of 362 deaths due to motor vehicle crash. The crude rate per 100,000 total population is 18.65.
 Note: Fatality counts are based on the location of the crash and not the decedent's residence.

Report Area	Total Population (2020)	Total Crash Deaths (2019-2023)	Fatal Crash Deaths, Annual Rate per 100,000 Population
