ACGME Approved with Osteopathic Recognition

With nine positions, the Transitional Year Residency (TYR) Program is approved for meeting the PGY-1 requirements of ACGME Residency Programs including Diagnostic Radiology, Preventive/Occupational Medicine, Anesthesiology, Psychiatry, Neurology, Physical Medicine and Rehabilitation (PM&R), Dermatology and Radiation Oncology. It can also be utilized as a stand alone year for those who are seeking extra clinical training, but have not yet decided on a specialty to pursue in future residency training. Osteopathic trainees will also get credit for completing an ACGME accredited Osteopathic Recognized Year, as we have achieved ACGME Osteopathic Recognition status, effective July 1, 2016.

Training Sites

Mercy Catholic Medical Center – Mercy Fitzgerald Campus, Hospital of the University of Pennsylvania-Cedar Campus, and PCOM Primary Care Clinic

Curriculum—26 Two Week Blocks of Rotations

- Internal Medicine
- Emergency Medicine
- Ambulatory Primary Care
- Intensive Care Unit (Med/Surg/Cardiac)
- Electives (Broad array of choices)

Goal of Mercy Catholic Medical Center TYR Program

To give you a solid foundation in Internal Medicine and the confidence to enter into your PGY-2 prepared, we provide a well-balanced program in multiple clinical disciplines tailored to meet the requirements of your specific future specialty, as well as your individual interests.

Strengths

- Responsive program leadership
- Flexible schedule with many electives to customize experience to your professional goals
- Diverse patient population from complement of inner city and suburban based hospitals
- Full complement of advanced surgical and medical subspecialties—you see and take care of sicker patients and learn new technologies
- Osteopathic training curriculum so DOs can strengthen their skills in OMT and maintain their Osteopathic identity
- Mission based—we serve all persons who are in need especially those who are vulnerable
